## **Multimedia Language Lab -- MLL**

### **Equipment List and Specifications**

## **Standards, Specifications and Conditions**

**All Equipment shall be Durable and Safe for School Use.  
Equipment wholly or partly funded from public funds is subject to Inspection  
by Officers from the Department of Education and Skills**

**It is essential that tenders and tenderers for equipment for school use shall:**

- Comply fully with the specifications and be durable and safe for school use.
- Comply fully with the standards as detailed and shall comply fully with European Standards (EN), both established and developing.
- Comply with European electrical standards and CE marking as appropriate.
- Fully comply with requirements in the Request for Tenders (RFT) document.
- Be accompanied by documentation of sufficient detail for full evaluation.
- Include the completed and signed certificate of compliance.

**Award of a contract is conditional on the production of a current tax clearance certificate.**

**Failure to comply with the above may result in the tender being deemed null and void.**

## **Descriptions and Details**

Management and student software is required for a Multimedia Language Laboratory with 30 student and one teacher/tutor places. The software is to be compatible with the school network operating system and to be installed on an existing server. Language software is not included here.

Multimedia computers of suitable specifications will be supplied by the school. No proprietary ICT or other hardware to be required. The supplier will advise the Client at the time of tendering, of any specific requirements such as general sound/video card specifications. The software should not interfere with or prevent other software being used in language learning.

The software system will facilitate recording and playback of student work and facilitate the transmission, of video, sound and text files from teacher to student desk.

The software will enable the teacher to communication with students and their recordings, individually, as a whole group and, or in pairs or larger groups. The student will be able to initiate contact with the teacher. Students should be able to work together in pairs and larger groups.

Each student will be able to record and playback his/her own work and to access a variety of materials from their desktops to include video, audio, text, and files made available or prepared by the teacher. The student will also have controlled access to approved internet sites.

## **Installation of Training and Support**

The supplier will install and fully commission the software and provide, as a minimum, the equivalent of one full day's onsite training for school staff. This training should be provided in three sessions or as agreed with the Client. A half day's onsite training to be provided early in the two succeeding school years.

Support shall be provided for three years from the date of installation, during the school year, from 9:00 to 17:00. This support will include a "helpline" and email query service and onsite visits, where necessary, to resolve problems.
