To whom it may concern,

I am so glad that a deposit scheme is being considered and hope that it will become a reality in the near future.

With climate change, protecting the environment, and protecting wildlife being extremely important issues, this scheme would go a long way to offsetting many of these issues.

I am actively involved with Serve the City Galway and Galway Tidy Towns, as well as constant litter picking in my local area. The majority of litter that we collect is bottles and cans, and while we don't expect a miracle to happen where this would end litter, it may create an incentive for people to recycle and help stem littering. It would also encourage people to recycle rather than putting items in their general waste and ultimately ending up in landfill.

Please, please, please do the right thing for the sake of the planet, for our own generation and also for future generations.

The Climate Change Performance Index has ranked Ireland as the worst country in Europe with regard to climate action. We desperately need more green initiatives. It's time to start walking the walk, we've had enough talk.

Kind regards,
