Subject: Deposit Return Scheme - Consultation on Potential Models for Ireland

CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

The Report recommends a centralised, operational model for Ireland. Do you agree with this recommendation? YES

- If not, do you favour a:
 - a) decentralised / financial DRS; or,
 - b) hybrid.
- Are there other models you believe could work in an Irish context?
- What role should waste collectors play in the operation of a DRS?
- The DRS study proposes a deposit per container of €0.20. Do you think this is appropriate? If not should it be higher or lower or should different deposit rates apply depending on container size? I THINK IT IS REASONABLE
- Consumers need to know about a DRS long before it becomes operational – do you have any suggestions as to how best the introduction of a DRS can be communicated to the public? TELEVISION, RADIO, SOCIAL MEDIA, LABELS ON THE PRODUCTS, ETC
- What enforcement measures should be considered in parallel with the introduction of a DRS?
- How should cross-border issues be treated to ensure producers are not at a competitive disadvantage relative to producers in Northern Ireland?
