The Report recommends a centralised, operational model for Ireland.

Do you agree with this recommendation?•

If not, do you favour a:

- a)decentralised / financial DRS; or,
- b)hybrid.

- answer hybrid

•Are there other models you believe could work in an Irish context?

-unknown

•What role should waste collectors play in the operation of a DRS?

-same as other countries where this has been in operation for decades

•The DRS study proposes a deposit per container of €0.20. Do you think this is appropriate? If not should it be higher or lower or should different deposit rates apply depending on container size?

Flat fee 0.20

•Consumers need to know about a DRS long before it becomes operational –do you have any suggestions as to how best the introduction of a DRS can be communicated to the public?

It is well known and been sought for, it has been in operation for decades outside of this country

Should be part of the labelling on the products

•What enforcement measures should be considered in parallel with the introduction of a DRS?

Why is it always enforcement in this country? REWARD

•How should cross-border issues be treated to ensure producers are not at a competitive disadvantage relative to producers in Northern Ireland?

-how does it work in NL/DE/Lux/BE/FR where all those countries share multiple borders with multiple countries?
