Hello, Just some responses to the questions posed in the document.

Thanks,
[Redacted]

The Report recommends a centralised, operational model for Ireland. Do you agree with this recommendation? **YES**

- If not, do you favour a:
 - a) decentralised / financial DRS; or,
 - b) hybrid.

Are there other models you believe could work in an Irish context?

What role should waste collectors play in the operation of a DRS?

The DRS study proposes a deposit per container of €0.20. Do you think this is appropriate? If not should it be higher or lower or should different deposit rates apply depending on container size? **THINK THIS AMOUNT IS APPROPRIATE.**

Consumers need to know about a DRS long before it becomes operational – do you have any suggestions as to how best the introduction of a DRS can be communicated to the public? **TV ADVERTS, SOCIAL MEDIA ADVERTS .. FOCUSING ON THE BENEFITS OF RECYCLING AND HOW THE DEPOSIT SCHEME WILL WORK TO BENEFIT THE PERSON ALSO, EVERYONE LIKES TO KNOW HOW TO MAKE SOME EXTRA MONEY AND IF IT IS SOMETHING THAT HELPS THE ENVIRONMENT, EVER BETTER :]**

What enforcement measures should be considered in parallel with the introduction of a DRS?
How should cross-border issues be treated to ensure producers are not at a competitive disadvantage relative to producers in Northern Ireland?
