Hi

As a Salmon & Pike angler alike, I will be making my submission to:

1. Introduce C&R on salmonoids as a primary method of protection.
2. Conduct scientific research and report on the results of the removal of the apex predator from the system on the environment, coarse and salmonoid fish alike.
3. For as long as the management is in place, to ensure Pike are transferred alive to other waters.

I would also be commissioning a study funded by anglers to prove the out of date research on the like of corrib that allows the fisheries (yourselves) allow a cull on pike if this isn't done by yourself first.

Thanks
