Good morning,

I refer to the above draft proposed bye law and i want to add my full support of this proposal.

These lakes are some of the most wondrous wild salmon and brown trout lakes in the World and are a huge contributor to our Tourism sector. However the management of the lakes and their catchment areas, particularly the rivers and streams that provide the spawning beds for these species, are under significant threat from many sources. Indeed the proposed Bye-Laws should also include these streams and rivers as they are the lifeblood of future stocks of these species.

Regards
