Re: 12 local bye-laws  
Designated Salmonid waters

In my submission I am in favour of these bye-laws but I feel there are also concerns with the draft bye-laws which are of concern to several of the local anglers.

Point 6. The word 'primarily' should be removed as its inclusion is confusing and it is not clear what is meant by 'primarily'. It should also be removed from the explanatory notes of the bye-laws.

Point 7. This should be worded differently and the wording of this should not be left to the discretion of the local anglers.

Point 8. The local anglers who are affected should be consulted and their views taken into account. It is also suggested that the three restrictions on salmon fishing as a trout should be fairly and equitably applied, ensuring the fisheries are not overfished.

Sincerely
