Hi,

I wish to object to the number of surplus salmon given to the owenea this year.

I fished much of the river for 102 days last year. From what I could see the return of nets had a drastic effect on the river. I was going 3 or 4 weeks without seeing a single salmon showing.

The figures given for the river have been bumped up from reported catches. I have still to receive an explanation for the random additional fish figures.

Something is very wrong.

Regards,
