Below please see submission in relation to the Wild Salmon and Sea Trout Tagging Scheme Regulations 2021, to provide for the management of the wild salmon and sea trout fishery by Inland Fisheries Ireland from 1st January 2022.

This submission relates to THE RIVER SLANEY and in particular to the opening date for salmon anglers. In the absence of a date published within the draft we have been left with no choice but to make the assumption that opening and closing dates will be in line with 2021.

I write to express my strong desire that you consider the early opening of the Slaney River for fly fishermen engaged in catch and release .

The fish though fewer in number are stronger fish ,the water is colder and fish are much more resilient and less stressed in a catch and release Enviromental as spring fish .

The presence of fly anglers will reduce the opportunity for early poaching due to larger angling presence on the River

Yours
