Re: SEA Scoping for the Policy Statement for Mineral Exploration and Mining in Ireland
RPS Ref: MDR1724Lt0005
Our Ref: 21/184 [cf.21/40]

Dear Sir/Madam,

Geological Survey Ireland is the national earth science organisation and is a division of the Department of the Environment, Climate and Communications. We provide independent geological information and advice and gather various data for that purpose. Please see our [website](#) for data availability. We recommend using these various data sets, when conducting the EIAR, SEA, planning and scoping processes. Use of our data or maps should be attributed correctly to 'Geological Survey Ireland'.

[REDACTED] letter from RPS dated 24 May 2021, concerning the SEA Scoping for the Policy Statement on Mineral Exploration and Mining in Ireland, Geological Survey Ireland would encourage use of and reference to [REDACTED] to add to the content and robustness of the SEA process. We also draw your attention to our previous consultation response in relation to the SEA screening stage (GSI ref: 21/40).

[REDACTED] to see the inclusion of 'Potential impacts on geo-heritage and associated tourism', as part of the [REDACTED] issues for consideration in the Environmental Report.

Scoping Question # 1

Based on the [REDACTED] policies and programmes outlined, are there any other key relevant international, national or programmes that should be considered in the SEA Environmental Report on the Policy Statement on Mineral Exploration and Mining?

In Section 4 'Other relevant plans and programmes', with regard to consideration of environmental protection objectives, we would welcome the inclusion of IUCN Guidelines for geoconservation in protected and conserved areas. This best practice guideline, number 31 in the series, is the first to address a fundamental part of nature - biodiversity and geoheritage and its protection and conservation following the broadening of the IUCN definition of a protected area to embrace all of nature.

Scoping Question # 2

Based on the likely significant impacts outlined above, are there any other effects or impacts that should be considered in the SEA Environmental Report on the Policy Statement on Mineral Exploration and Mining?

Geological Survey Ireland would encourage use of and reference to our datasets. Please find attached a list of our publicly available datasets that may be useful to the environmental assessment and planning process. We recommend that you review this list and refer to any datasets you consider relevant to your assessment.

Scoping Question # 3

Do you have any comments regarding the draft SEA Objectives presented?

In Table 7-1: Draft SEA Environmental Objectives, Objective 3: 'Safeguard soil quality and quantity', we note the objective is very broad and general compared to other objectives. We recommend making reference to key soil functions and threats as described in the [EC Soil Strategy Roadmap](#).

In Table 5-1: Potential Significant Environmental Issues, Land and Soil Topic, we welcome the mention of 'Potential impacts on geo-heritage and associated tourism' as it underpins biodiversity, scientific knowledge, and potential educational and tourism values.

Scoping Question # 4

Do you have any suggestions or comments in relation to the overall approach to alternatives?

In Table 6-1: Baseline Data Sources and Extent of Assessment, SEA Topic 'Cultural Heritage', we are pleased to see inclusion of UNESCO world heritage sites but would welcome the inclusion of Ireland's three UNESCO Global Geopark Programmes (Copper Coast, Burren and Cliffs of Moher, and Marble Arch Caves), and aspiring geopark project (Joyce Country and Western Lakes).

I hope that these comments are of assistance, and if we can be of any further help, please do not hesitate to contact me Clare Glanville, or my colleague Trish Smullen at GSIPlanning@gsi.ie.

Yours sincerely,
