CARBON BUDGET CONSULTATION

Climate Justice

CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Dear Minister Ryan and the Government

I respect climate justice in all its forms.

The climate emergency is a global crisis that requires a global response. The UK has a leadership role to play in addressing this crisis and in supporting other countries to do the same.

Dear Minister Ryan and the Government,

1. **Respect climate justice!**

The UN says emissions reductions of 7.6% are needed *on global average* each year until 2030 for a chance of staying below 1.5C - and that assumes achieving massive "negative emissions" later. Your Government promised average annual reductions of 7% in the Programme for Government. The Climate Change Advisory Council (CCAC) has proposed less than 6%.

7% = Budget of 468 MtCO₂e to 2030 (-27 compared to CCAC proposals)

7.6% = 454 MtCO₂e (-41)

Even these are much too large. To do our fair share and comply with the Climate Act we need **MUCH SMALLER** budgets! Excluding speculative negative emissions, our fair share of the global budget for 1.5C is set to be used up 3 years from now!

2. **No accounting tricks!**

Carbon budgets should count emissions and removals in the relevant 5-year period. The Government must rule out accounting tricks like borrowing speculative future removals to balance the books (on paper) today!
