A Chara,

The carbon budgets should be front loaded. We have to start taking action immediately. The current proposals require most of the reduction targets to begin later in the decade. That is not good enough. We have to start acting now.

We must not assume that carbon sequestration, carbon capture and storage or any other method which allows us to keep on emitting will save us in the future.

Stop building data centres. Stop Ceta. Stop Mercosur. Support farmers to practice sustainably. Stop fossil fuel subsidies. Tax the polluters. Tax the fossil fuel corporations. Your carbon tax won't save us.

Is mise,
