CARBON BUDGET CONSULTATION  
Climate Division – Public Consultation on Carbon Budgets

**CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.**

**Dear Minister Ryan and the Government,**

**1. Respect climate justice!**

The UN says emissions reductions of 7.6% are needed *on global average* each year until 2030 for a chance of staying below 1.5C - and that assumes achieving massive "negative emissions" later. Your Government promised average annual reductions of 7% in the Programme for Government. The Climate Change Advisory Council (CCAC) has proposed less than 6%.

4% = Budget of 468 MtCO<sub>2</sub>e to 2030 (-27 compared to CCAC proposals)  
7.6% = 454 MtCO<sub>2</sub>e (-41)

Even these are much too large. To do our fair share and comply with the Climate Act we need **MUCH SMALLER** budgets! Excluding speculative negative emissions, our fair share of the global budget for 1.5C is set to be used up 3 years from now!

**2. No accounting tricks!**

Carbon budgets should count emissions and removals in the relevant 5-year period. The Government must rule out accounting tricks like borrowing speculative future removals to balance the books (on paper) today!

All the best,  
[REDACTED]
