CARBON BUDGET CONSULTATION  
Re letter to Minister.

**CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.**

I am disturbed by the exclusion of aviation and shipping from the Carbon Budget system because these two items contribute greatly to the world quantity of CO2 generated. I presume that these are excluded because the rules and regulations relating to them are embedded in international treaties and so cannot be altered by one country acting alone; the disturbing aspect of the letter is that there is no reference to a mechanism or any suggestion that aircraft or shipping can or should be brought into the system of CO2 control.

It will be totally impossible to meet the world's climate change and environmental goals and needs unless all sectors contribute their fair share.

I request that a paragraph be inserted in the letter to take account of these important inconsistencies.

Faithfully,
