Dear Sir/Madam

As a citizen and a taxpayer I believe the carbon budgets proposed are impossible to achieve without inflicting enormous pain on ordinary people and rural dwellers in particular. I believe they should be scrapped and a meaningful dialogue should take place with citizens outlining the costs and benefits of carbon targets. A very small minority of ideologically driven climate concerned people have had excessive influence on this discussion to date. Can you please send me an acknowledgement that you have received my submission please.

Regards
