To the Dept of Environment, Climate and Communications:

Time is running out . The higher income countries who have contributed most to Global Warming must do their fair share.

Our electorate are not educated on how we as a country and as individuals are contributing to the destruction of the planet. Without me joining Dublin Bay North One Future in 2020, I would be unaware of this Consultation Process. I have posted to my friends on Fb and LinkedIn this evening the extract below :

I hope this constitutes a submission and that you will be guided by the Senator Alice Leahy

"Senator Alice Higgins urges each of us to respond to Public Consultation below " Ireland's first two Carbon Budgets as currently proposed are not ambitious enough. They don't match up to either UN standards or the promises in the programme for government, they don't deliver climate justice and there are potential loopholes and accountancy tricks like 'forward counting' which need to be taken off the table. However, the budgets are not yet finalised and there is still a chance to improve them if we act fast – I encourage everyone to speak up in the public consultation before it closes on February 8th"

Regards and keep trying to communicate this opportunity for climate justice.
