

Submission [REDACTED] To Department of Communications, Climate Action and Environment In response to OREDP Mid term review

- 1 Government to assess the potential of all indigenous proposed WEC technologies which have received SEAI grant aid, choosing the two most promising and providing the resources to develop these to TRL 7-8 including sea trials off Irish West Coast.
- 2 Government to purchase the useful IP – assessed by independent expert in wave energy development – from indigenous developers.
- 3 Developers not willing to sell IP to state shall not avail of any further state grants.
- 4 Government to develop and resource one Irish West cost port and one construction yard such that these can enable full scale wave energy converter technology and offshore wind technology by 2023.
