Consultation on the redesign of Ireland's Energy Efficiency Obligation Scheme

Panda Power wish to acknowledge this consultation and provide some feedback without completing the full questionnaire. As a licenced gas and electricity supplier in the Republic of Ireland market we will likely become an obligated party once a final decision is published. We would support the 400GWh threshold and would seek support from the department and SEAI to inform and guide us into this process. As members of the EAI we support the submitted response and positions taken.

Yours sincerely,
