To whom it may concern,

We, at Wexford Greens, believe the Clean Air Strategy must include at a minimum:

- * Legislation for WHO Air Quality limits by 2025
- * Low Emission Zones in cities
- * An Active Travel revolution
- * Plans for cheaper and higher quality public transport links
- * Expedited retrofitting programmes for households most impacted by solid fuel regulations
- * Support for farmers to help curb ammonia
- * Investment in alternatives to air travel

Please note that time is of the essence here and all targets must change in line with the latest findings in the U.N. IPCC Report.

Thank you

Kind Regards,
