[REDACTED],

I am suffering extreme pain and reactions from all EMF .

I have a serious spinal cord injury and tumor which I have had over 25 MRI scans and contrast dye , I am now reacting badly to magnetic , electric and radio fields because I have had too many scans which has damaged my body and gadolinium (gadolinium heats up hotter than any metal which under magnetic fields) . I was always told by my surgeon MRI scans were safe and contrast dye was excreted out . Now I know some people react badly to MRI scans and contrast dye can and is retained in the body . My legs and torso burns from magnetic fields like acid being poured over me .

I am living in absolute hell, I can't work and have a mortgage since 2007 , I have lost my career and live on the breadline because I live in worsening and I may lose my home, I live with excruciating pain all day. . I can only dream of the normal life I once had.

I need to live with very limited levels of electricity, I can't go under lights , WiFi, hotspots, Bluetooth etc etc. Mobile phones give me stabbing head pain and hand pain from as distance . My symptoms and reactions are worsening and endless, .

How can someone like me live in this changing pulsing radiating world and with things set to go get worse from 5g pulsing everywhere 24 hours ? I will not survive this .

Am I not entitled to live in a environment which is safe for me to go outside ? Ireland is already bad enough with the advancement of all this smart , electrified cars, meters let alone all the mobile phone masts which are pulsing magnetic and radio fields well well above safe levels .

Where do people like me who have been gaslighted, ignored , laughed at with no admittance to the damage they are suffering go or live?, it's about time we had a voice and consideration for what we are suffering and also the stronger this technology gets the more people will be damaged .

I live a lonely , painful life for the last few years, living with a superserve gas bottle heater and a gas camping stove , I turn on and off certain fuses when I need them because I can't live with full electricity, it's a absolute nightmare that I wouldn't wish on anybody. Every journey is painful as I live surrounded by cell towers, writing this email is painful with pains in my chest and hand and pulsing blood vessels in my hand , stiffening right arm and pains throughout my body, imagine my life ? I can't afford to move , my doctor has tried everything to ease my pain.

Where do I go?

Will there be zones created for us like in other countries ? The people who can't live is this constant radiation deserve a healthy place to live that allows them to go outside, don't you think ? We need recognition , we deserve recognition.

I invite you to come and visit me and see my reality.

Regards
