

Transport

Q59: What platforms or mechanisms can best facilitate the sharing of data, transport modelling and research findings with policy makers, local authorities, research groups, local communities and the wider public?

Active Travel Counts:

Any relevant datasets should be available on the existing open data platform data.gov.ie

Example of datasets include:

- footfall and cycle counts
- traffic counts
- air quality
- public transport passenger stats

etc.

The data should be available in realtime to facilitate maximum re-use (and impact) by 3rd parties

Every local authority/state agency that has such datasets must make them available - currently only a small % of such datasets are available on data.gov.ie
