February 2017

## Introduction

From the 2016/2017 academic year onwards, the Primary Online Database (POD) replaced the National School Annual Census as the definitive source of statistics on pupils in primary schools.

The following are some highlights of the data collected, and refer to pupils enrolled in Department of Education \& Skills-aided national schools in the 2016/2017 academic year. In some tables, time series data is shown for comparison purposes; data prior to the 2016/2017 academic year is sourced from the National School Annual Census.

There were 558,420 pupils enrolled in 3,250 National Schools in the 2016/2017 academic year. Data are centred on enrolment as of the $30^{\text {th }}$ of September 2016.

## Profile of the schools

The 3,250 schools $^{1}$ figure comprises 3,115 mainstream schools, with enrolment of 550,304 pupils and 135 special schools, with enrolment of 8,116 pupils. See Table $1 a$.

Of the mainstream schools, 640 schools, with enrolment of 104,059 pupils, were in the Delivering Equality of Opportunity in Schools (DEIS) programme. See Table 1 b.

Just under $90 \%(2,904)$ of the schools had a Catholic ethos, followed by $5.4 \%(175)$ with a Church of Ireland ethos and $3.7 \%$ (120) with a multi-denominational ethos, covering $90.1 \%, 3.0 \%$ and $4.9 \%$ of enrolment respectively. See Table 1c.

## Enrolment changes over time

The enrolment of 558,420 pupils in 2016/2017 was an annual increase of over 5,000 pupils in the year since 2015/2016. However, although the numbers increased, the level of increase has started to slow down. See Graph A below and 'Who are the pupils?' section on the next page.

[^0]
## Who are the pupils?

The introduction of POD, which includes the collection of dates of birth, means that for the first time data is available on the ages of pupils as of the $30^{\text {th }}$ of September. The previous National School Annual Census collected pupils' ages as of the $1^{\text {st }}$ of January in each academic year.

Table 3a shows the age and sex of all pupils for both mainstream and special schools, as of the $30^{\text {th }}$ of September. Note that there were 220 pupils aged 3 enrolled in mainstream schools, the vast majority of which were in Early Intervention special classes in mainstream schools. A distinctly higher proportion of the 3 -year-olds were male (171 out of the 220).

Table 3b shows the age of pupils as of $30^{\text {th }}$ of September classified by the standard they were in. On the $30^{\text {th }}$ of September 2016, $52.5 \%$ of junior infants were aged 4 and $46.9 \%$ were aged 5 . By January 2017, this had changed to $27.3 \%$ of junior infants aged 4 and $71.2 \%$ aged 5 . Table 3 d presents a time series of the age of junior infants as of the $1^{\text {st }}$ of January in each academic year. It is notable that the percentage of 4 - and 5-years-olds has changed significantly from almost 50/50 (46.7\% 4-year-olds to $51.9 \% 5$-year-olds) in 2000/2001 to nearly one quarter 4 -year-olds to three-quarter 5 -year-olds in 2016/2017 ( $27.3 \% 4$ years olds to $71.2 \% 5$ year olds). The introduction of the free pre-school (ECCE) year has had an impact on the starting age of children and for the most recent year the impact of the second school year can be clearly observed, with children starting school later. See Tables 3b, 3c, 3d and Graph B below.

## Other characteristics

## Nationality

The introduction of POD has enabled the collection of data on individual nationalities. Nationality is recorded by the schools as defined by the parents/guardians of the pupils and a drop-down list of all countries is available in POD. The top nationalities in mainstream schools are presented in Table A below. The number of pupils with an Irish nationality was the largest group, representing $89.6 \%$ of total enrolment. This was followed by nationality of Poland. There was less variation in nationalities in pupils enrolled in Special Schools, with $91.7 \%$ with an Irish nationality followed by $2.2 \%$ with a
dual nationality including Ireland as one of the countries and 1.3\% Polish. A full list can be found in Tables 4a and 4b.

Table A: Mainstream pupils classified by top nationalities and sex

|  | Female | Male | Total | $\%$ |
| :--- | :--- | :--- | :--- | :--- |
| Ireland | 241,056 | 252,184 | $\mathbf{4 9 3 , 2 4 0}$ | 89.6 |
| Poland | 7,675 | 7,892 | $\mathbf{1 5 , 5 6 7}$ | 2.8 |
| Lithuania | 2,299 | 2,216 | $\mathbf{4 , 5 1 5}$ | 0.8 |
| Romania | 1,850 | 1,882 | $\mathbf{3 , 7 3 2}$ | 0.7 |
| Dual Nationality (Ireland and other) | 1,746 | 1,916 | $\mathbf{3 , 6 6 2}$ | 0.7 |
| United Kingdom | 1,731 | 1,713 | $\mathbf{3 , 4 4 4}$ | 0.6 |
| Latvia | 1,300 | 1,303 | $\mathbf{2 , 6 0 3}$ | 0.5 |
| India | 1,110 | 1,125 | $\mathbf{2 , 2 3 5}$ | 0.4 |
| Nigeria | 868 | 903 | $\mathbf{1 , 7 7 1}$ | 0.3 |
| China | 589 | 580 | $\mathbf{1 , 1 6 9}$ | 0.2 |
| Pakistan | 529 | 579 | $\mathbf{1 , 1 0 8}$ | 0.2 |
| United States of America | 508 | 514 | $\mathbf{1 , 0 2 2}$ | 0.2 |
| Spain | 526 | 483 | $\mathbf{1 , 0 0 9}$ | 0.2 |

## Mother tongue

An optional question on whether English or Irish is one of the mother tongues of each pupil is also included in POD for mainstream schools. Three-quarters of pupils said that English or Irish was one of their mother tongues. $8.7 \%$ or 47,973 pupils said it wasn't and $16 \%$ didn't respond to the question. Interestingly, 17,250 or $35.9 \%$ of those pupils for whom English or Irish was not one of their mother tongues had an Irish nationality. See Tables $4 b$ and $4 c$.

## Ethnic or cultural background and religion

Optional questions on ethnic or cultural background and religion are asked in POD. Note that as these are personal sensitive pieces of information, under data protection these questions must be optional and parental/guardian consent is required for this information. The level of non-response or 'no consent' response is close to $30 \%$ so caution is required when interpreting the data.

The proportion of pupils in each category of 'ethnic or cultural background' were very similar for both mainstream and special schools. The largest categories for both special and mainstream schools combined (apart from non-response 98,489/no consent 64,580) were White Irish with 320,773 pupils followed by Other White Background (34,030), Asian or Asian Irish - any other Asian $(10,478)$ and Irish Traveller $(7,980)$. The proportions in each category are similar to those in the 2011 Census of Population. For the first time data is also available on the number of pupils who indicated that they were of a Roma Ethnic or Cultural background $(1,323)$.

Note that the number of pupils in mainstream schools who indicated that they were members of the Traveller community $(7,802)$ was slightly lower than the data collected in previous years via the

National School Annual Census. In the 2015/2016 Census there were 8,000 Traveller pupils in mainstream schools. The data was not previously collected for special schools.

The largest categories (excluding no consent 62,573/non-response 85,674) in response to the religion question were Roman Catholic $(359,921$ pupils), no religion $(10,333)$ Church of Ireland (Anglican) $(9,195)$, Muslim (Islamic) $(8,953)$. The proportions differ slightly from those of the 2011 Census of Population suggesting that the no consent/non-response may be concentrated more from some categories than others.

When comparing mainstream to special schools there are some differences in the proportions of pupils in the lesser represented religions, however it is worth noting that the figures for these groups in special schools are very small anyway. See Table 4 e .

## Where did they come from?

The vast majority of Junior Infants came from a pre-school setting (59,874 or $87 \%$ of all junior infants). A significant number, 4,697 , came directly from home having not gone to pre-school. Other sources worth noting were 266 pupils who came to junior infants from schools abroad, 101 pupils switching from special classes/special schools to junior infants (67 pupils who started in a special class in the school and transferred to a mainstream class, 34 pupils who started in a special school and transferred to junior infants in a mainstream school) and 60 pupils who transferred in from a private primary school. 38 pupils came from schools outside of the State.

Note that the pupil source recorded for nearly 900 (894) junior infant pupils was another mainstream school in the State. This reflects situations at school level where pupils either move during September, or pupils may have accepted places in more than one school and first appear on the POD system in one school even though they physically haven't attended it. The POD system requires that pupils records are be transferred from the first school in which they were registered to the second school. See Table 5.

A pupil source of other or not stated accounted for the remaining 2,576 junior infants. See Table 5.

## Exemptions from the study of Irish

There were 5,128 pupils with an exemption from the study of Irish who were enrolled in mainstream schools in the 2016/2017 academic year. Of these, a greater number of exemptions were granted to males $(3,158)$ than to females $(1,970)$. By far the most common reason given for the exemption was a Learning Disability ( 3,967 or $77 \%$ of all exemptions). POD collects information on the date the exemption was granted - 895 of the exemptions were granted in the 2016/2017 academic year. See Tables 6a and 6 b.

## Special schools - post-primary programmes

As reported in POD, there were 723 students in 36 special schools who were following a postprimary programme. The majority of these special schools offer education programmes from primary through to post-primary levels. The most common programmes followed were the Junior

Certificate Schools Programme (286 students) and the Junior Certificate Programme ( 251 students) although some students were following Leaving Certificate or equivalent programmes. It is possible that this data is underrepresented, data previously collected via the Special School Annual Census indicates that there were 1,353 pupils following post-primary programmes in 53 special schools in the 2015/2016 academic year. See Tables 7a and $7 b$.

| Exemption Type | Female | Male | Total |
| :--- | ---: | ---: | ---: |
| Children Of Foreign Diplomats/Consulars/ Children of Political Refugees As Designated By The | 14 | 7 | 21 |
| Education Up To 11 Years Received Outside Of The Republic Of Ireland | 127 | 143 | 270 |
| Learning Disability | 1,344 | 2,623 | 3,967 |
| Pupils From Abroad With No Understanding Of English When Enrolled | 478 | 370 | 848 |
| Re-Enrolment After Minimum 3 Years Abroad And Minimum 11 Years On Enrolment | 7 | 15 | 22 |
| Grand Total | $\mathbf{1 , 9 7 0}$ | $\mathbf{3 , 1 5 8}$ | $\mathbf{5 , 1 2 8}$ |

Table 6b: Number of exemptions from the study of Irish granted during the 2016/2017 academic year*

| Exemption Type | Female | Male | Total |
| :--- | ---: | ---: | ---: |
| Children Of Foreign Diplomats/Consulars/ Children of Political Refugees As Designated By The | 6 | 4 | $\mathbf{1 0}$ |
| Education Up To 11 Years Received Outside Of The Republic Of Ireland | 79 | 86 | $\mathbf{1 6 5}$ |
| Learning Disability | 172 | 317 | $\mathbf{4 8 9}$ |
| Pupils From Abroad With No Understanding Of English When Enrolled | 126 | 92 | $\mathbf{2 1 8}$ |
| Re-Enrolment After Minimum 3 Years Abroad And Minimum 11 Years On Enrolment | 4 | $\mathbf{9}$ | $\mathbf{1 3}$ |
| Grand Total | $\mathbf{3 8 7}$ | $\mathbf{5 0 8}$ | $\mathbf{8 9 5}$ |

[^2]Table 7a: Pupils in special schools in 2016/2017 classified by whether they are following a post-primary programme

| Following a post-primary programe | 723 |
| :--- | ---: |
| Not following a post-primary programe | 7,393 |
| Grand Total | $\mathbf{8 , 1 1 6}$ |

Table 7b: Pupils in special schools following a post-primary programme classified by type of programme

| Programme Type | 251 |
| :--- | ---: |
| Junior Certificate | 286 |
| Junior Certificate Schools Programme | 57 |
| Leaving Certificate | 59 |
| Leaving Certificate Applied | 120 |
| Other programme at Levels 1,2 or 3 on the NFQ or <br> equivalent | 33 |
| Other programme at Level 4 or above on the NFQ or <br> equivalent | 2 |

Note the total is greater than 723 as the categories are not mutually exclusive (i.e a pupil could be following one subject in a Leaving Certificate programme and another subject at Level 4 on the NFQ

These pupils were in 36 schools.

## Background Notes

The definitive source of statistics on pupils in primary schools up until and including the 2015/2016 academic year was the National School Annual Census. From the 2016/2017 academic year onwards, the Primary Online Database (POD) replaced the National School Annual Census as the definitive source of statistics. POD is an individualised database of pupils enrolled in primary schools which are recognised by the Department. POD is a live database which allows for the updating of information throughout the year. The purpose of POD is to monitor the progress of children through the education system in order to ensure that every student can meet their educational potential, and to ensure that every child of compulsory school age is in receipt of an education. POD data will underpin the provision of education in primary schools, with grant payments and teacher allocations to schools based on the individually verified data.

There were two additional National Schools in 2016/2017 with combined enrolment of 88 . However, for operational reasons the data from these schools is not collected through POD.

The ethnic/cultural background of the pupil, and the pupil's religion are personal sensitive data items and in relation to these fields, the express written consent of the parents/guardians is required before this data can be recorded for a student on POD and accessed by the Department of Education and Skills.

Further details on POD can be found in the Department's Fair Processing Notice at http://www.education.ie/en/Publications/Statistics/Primary-Online-Database-POD-/POD-Fair-Processing-Notice.pdf
