Draft Green Public Procurement Strategy and Action Plan Public Consultation Questions

Template for Responses

No.	Question
1	Do you think the approach as detailed in the draft Green Public Procurement Strategy and Action Plan will significantly increase Green Public Procurement across the Public Sector?
Response:	It has the potential yes. The urgency of taking on climate change mitigation measures needs to be highlighted more. Please note: We are actually in a climate emergency situation. (IPCC Report-AR6 Synthesis Report: Climate Change 2023)
2	Are there any other key aspects or actions that could be effective in implementing Green Public Procurement and that you think should be considered for inclusion in the Green Public Procurement Strategy and Action Plan?
Response:	Every action may be addressed more stringent to the relevant & responsible Department or Body, including a definitive deadline to be delivered.
3	In terms of the sectoral/product targets included in the draft Green Public Procurement Strategy and Action Plan, do you have any views in relation to the targets, the ambition level, and a timeframe for target achievement?
Response:	Some Deadlines and % targets are left open. Include low carbon into T1: By 20XX, a minimum of X% of construction materials procured by public bodies under new contract arrangements comprise low carbon , reused or recycled materials.
4	Are there any other sectoral/product targets related to Green Public Procurement that you think should be considered for inclusion in the Green Public Procurement Strategy and Action Plan?
Response:	-

5	Have you any other comments or feedback on the content of the draft Green Public Procurement Strategy and Action Plan?
Response:	If possible, it should include a glossary of relevant terminology and definitions. Define the "carbon footprint" in terms of whether it is energy-based and only considers the greenhouse gas "CO ₂ " as a mono criterion from scope 1 and 2 or whether it considers all GHG emissions.
