

Nearly 1-in-10 13-year-olds had tried vaping

And it was more common among young people with a parent who vaped (15%)

One-in-five 13-year-olds had a parent living elsewhere.

Contact with that non-resident parent was more likely if they had previously lived together.

What 13-year-olds looked forward to in adulthood

Travelling to different countries - 32%

Having their own place - 18%

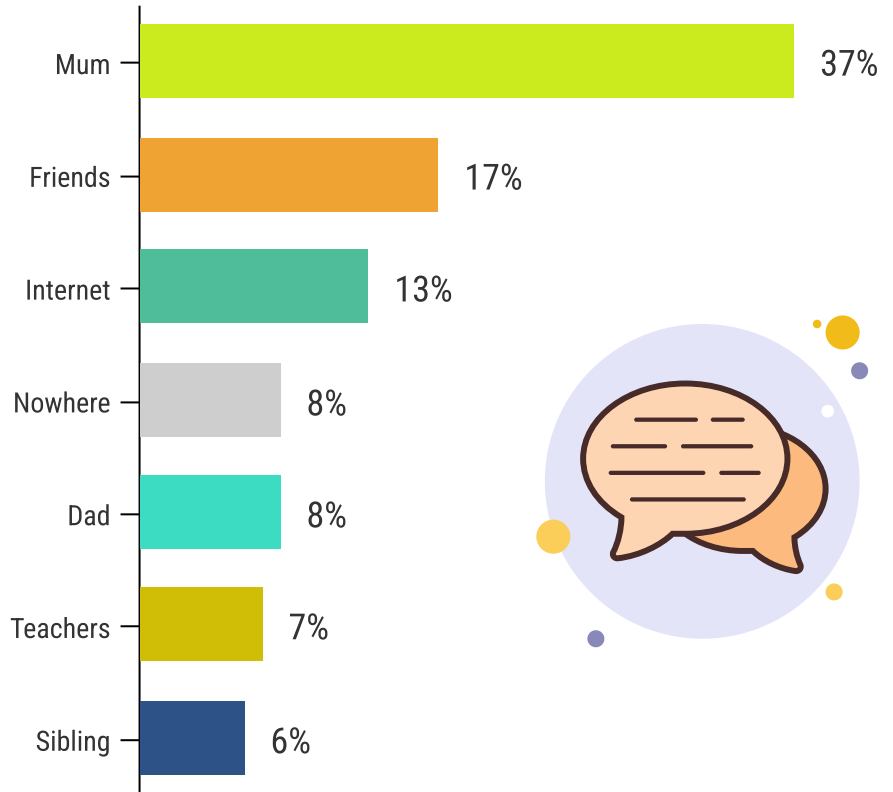

Getting a job - 16%

Having their own money - 15%

Sources of information or advice on sex and relationships

Mothers were the most popular source of information or advice on sex and relationships

Many 13-year-olds had recent experience of bullying behaviours

The most common were:
