## Part 1 - Introduction

### What is Performance-Based Budgeting?

Performance-based budgeting aims to improve the effectiveness and efficiency of public expenditure by linking the funding of public sector organisations to the results they deliver, making systematic use of performance information.<sup>1</sup>

Performance reporting is therefore a key element of a suite of expenditure reform measures implemented in Ireland with the objective of focusing public management on results delivered from public expenditure in terms of outputs and impacts.

While there are a number of models of performance-based budgeting and performance reporting internationally, the basic underlying principle is to ensure that, when formulating expenditure plans, decision makers systematically take into account the results to be achieved by expenditure.

### **Performance Reporting in Ireland**

Following a pilot exercise in 2011, performance reporting was introduced across all areas of public expenditure in 2012 as part of a suite of reforms to the public expenditure framework. The Revised Estimates Volume (REV) was reformatted to provide information at a programme level on financial and human resources, public service activities, outputs and context and impact indicators for each Vote. The introduction of the initiative laid the foundation for a more systematic engagement by members of the Oireachtas and the public on the impact of public policies and on resource allocation decisions.

Following the publication of REV 2016, a detailed analysis of the type and quality of performance information provided was carried out by the Department of Public Expenditure and Reform (DPER). Alongside this, a comprehensive guidance note on enhancing the quality of performance information was developed by DPER and circulated to Departments. In line with this guidance note and based on the results of the review, detailed feedback was provided to each of the main Government

<sup>&</sup>lt;sup>1</sup> Robinson, M. (September 2011), Performance-Based Budgeting, CLEAR/World Bank.

Departments, in order to assist them in selecting and reporting on appropriate performance indicators meeting best practice standards.

Following this review and the engagement process with Departments in which feedback and guidance was provided on how to strengthen and enhance the quality of the information, there was a significant improvement in the quality of performance information provided for REV 2017. This is also reflected in the Public Service Performance Report 2017 with a noticeable increase in the quantitative information.

### **Purpose of the Performance Report**

The 2016 OECD 'Review of Budget Oversight by Parliament: Ireland' (2016) highlighted the requirement to provide enhanced performance information to support the Oireachtas in assessing the outputs and outcomes from public expenditure. This is important in ensuring value for money from existing expenditure programmes in line with the objectives of the Spending Review.

A key focus of the proposals that emerged from the OECD review centred on the need to make space in the budget cycle for a performance dialogue between committees and public bodies. A crucial issue identified in the OECD review was the lack of dedicated time to have an in-depth evidence-based discussion with departments and other public bodies about the performance information that is reported on, its relation to higher-level strategic outcomes, and the linkage between resources allocated and results achieved.

The intention of the Performance Report is to help enhance the focus on performance and delivery by presenting relevant performance indicators in a dedicated, focused document, which will enable sectoral Committees make best use of the time allocated for reviewing performance measures.

A challenge identified by the OECD in supporting the realisation of this goal relates to the timing of the publication of the REV. Owing to the fact that the REV is published prior to the end of the year, outturn information is not available for the current year, and only targets can be published. Oireachtas Committees do not, therefore, have relevant outturn information related to performance available to them in a timely

fashion to enable them to interrogate performance in the preceding year. The Performance Report addresses this shortfall, as it provides timely information on what was delivered with public funds in 2017.

This Performance Report is arranged by Vote Group and provides an overview of the funding allocated to each Vote Group, as well as staff numbers, trends across categories of expenditure and a breakdown of the composition of spend and spend by programme. Based on the quantitative targets stated for 2017 in the REV, output information is then presented in a dashboard format, at programme level.

The objective is, over time, that annual reporting of consistent metrics can build up a picture of performance trends in different sectors and can help to track progress in relation to the achievement of key strategies and public policies in respect of the substantial public resources that are allocated.

### **Equality Budgeting**

There is currently a pilot cycle of equality budgeting which focuses on a number of diverse expenditure programmes already in existence across a range of Departments. The Departments participating in the pilot conducted an assessment of the chosen policy areas with a view to defining high level equality objectives and performance indicators for the policies in question. These objectives and performance indicators were outlined in the 2018 REV, which was published in December last year. An update on the progress and steps that are being taken by Departments to work towards realising their objectives is contained in Chapter 3.

### **Going forward**

This is the second year the Performance Report has been published and the model of performance reporting in Ireland continues to evolve. The publication of data on key indicators for a two year period provides the opportunity to assess progress in achieving key priorities from public spending. Feedback would be appreciated on the appropriateness and the value of the indicators provided in this report in order to support the further development of performance reporting in the future.

## Public Services in 2017 At A Glance

The below image gives a snapshot view of the context in which public services were delivered in 2017. In light of increasing demand in a number of areas, it highlights the need to ensure that public services are delivered in an effective and efficient way in order to continue to meet the needs of citizens.

The **population** of Ireland is over 4.79 million, with the largest annual increase since 2008

321,530 Weekly Payments of Illness, Disability & Carer's Benefit

Over 558,300 students attended Primary School and over 384,200 attended Secondary School

The proportion of the population **aged 65+** has increased from 11.7% in 2011 to 13.6% in 2017

**487,510** People covered by **GP visit cards** at year end

Each week over 1.2 million people receive a social welfare payment

88,779 **children** were enrolled in the Early Childhood Care and Education Programme

22,949 people received funding for long-term residential care under the Nursing Home Support Scheme

There were over 214,000 recorded crime incidents in 2017

Over 250 million journeys were taken on public transport services, with a PSO subvention of €264.5m

9,061 **Charities** on the Register

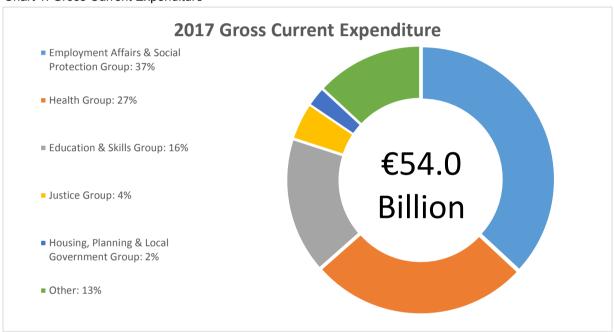

An average of 571,980 **pension** payments were made each week by the Department of Social Protection

## Overview of the Public Service

Before looking at the outputs delivered across the public service, it is important to be aware of the resources utilised to deliver public service outputs and outcomes. While size, cost and inputs alone are not the sole or even main determinants of good public administration, nevertheless in terms of value for money in the delivery of public services, keeping check on the size, cost and other inputs of the public sector and public service is an important consideration.\* In 2017, gross expenditure on public services was over €58bn. This was divided between current and capital expenditure, as shown in the charts below.

Chart 1: Gross Current Expenditure

Rounding may affect totals

Chart 2: Gross Capital Expenditure

Rounding may affect totals

<sup>\*</sup>Boyle, R. 2016. Public Sector Trends 2016, Dublin: Institute of Public Administration

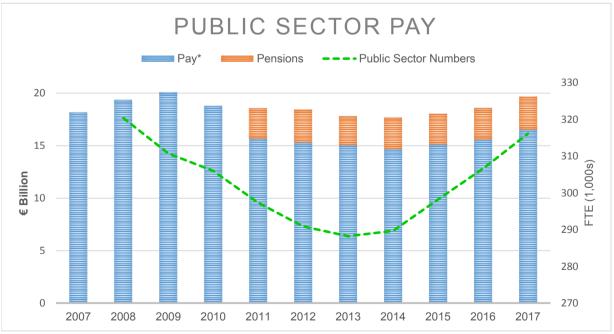

### Overview of the Public Service

In 2017 there were almost 317,500 public servants delivering a diverse range of services across hundreds of organisations. The below chart shows the distribution of public sector employees across a range of sectors.

Rounded to nearest 100. 'Health' here refers to HSE staff.

The below chart shows the trends in public sector pay and numbers over the last decade. Public service numbers had been falling consistently up to 2013. Since 2014, numbers have been increasing. Similarly, the public service pay and pension bill followed a downward trajectory until 2014. In 2015, the pay and pensions bill showed its first increases since 2008. For 2017 the gross expenditure on pay and pensions was €19.6bn.

Source: Databank

<sup>\*</sup>Pay figures from 2007 - 2010 are inclusive of pension costs.

## Part 2 – Performance By Vote Group

#### **Introduction to Part 2**

This section of the Report contains information about the performance of each Vote Group in 2017. For Each Vote Group there is an overview of the funding provided and a breakdown of expenditure by composition and programme. Expenditure trends across a number of categories of expenditure are also shown for the period 2013-2017.

Staffing numbers are provided for each Vote Group, broken down by civil<sup>1</sup> and public servants. All Non-Commercial State Agencies under the aegis of a Department are also listed for each Vote Group. Please note that not all Non-Commercial State Agencies listed are in direct receipt of Exchequer expenditure. However, the relevant Department still has an oversight role for these bodies.

Performance metrics are provided for each programme area across a range of activities. For the majority of the metrics reported on, targets have been set out in the Revised Estimates Volume for Public Services 2018 (REV 2018) or in sectoral policy documents.

A key aim of this Performance Report is to provide accurate information in a timely manner. As expenditure on public services is diverse and encompasses many large programmes, it is not always possible to have accurate year-end figures collated by the end of April each year. For a number of areas, data related to 2017 performance was unavailable at the time of publication, and will be reported on in the Revised Estimates Volume 2019 (published in December 2018), or by the relevant public service body during the course of the year.

7

<sup>&</sup>lt;sup>1</sup> The figure for Civil Servants provided includes Civil Servant Industrial grades.

### Justice Group

### At a glance:

• Gross Expenditure €2,596.1m

Staff (FTE at end Q4)

• Civil Servants 9,660

Public Servants 14,179

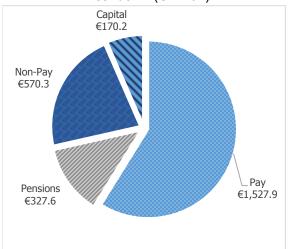

Non-Commercial State Bodies 2\*

Pay Bill (% of Gross Current Expenditure) €1,528.0m (63.0%)

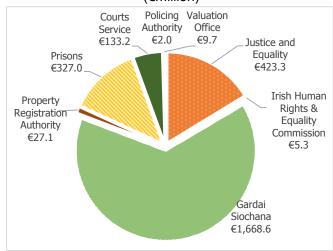

Administrative Costs €1,643.0m

### Composition of Expenditure\*\*

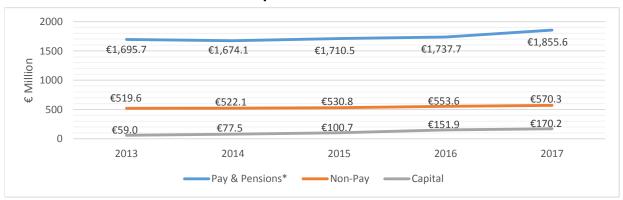

Pay, Pensions\*, Capital and Non-Pay Breakdown (€million)

## Gross Expenditure By Programme (€million)

<sup>\*</sup>Retired Civil Servants are paid from the Superannuation Vote.

<sup>\*</sup> National Disability Authority, Ordnance Survey Ireland

<sup>\*\*</sup>Includes Capital Carryover of €12.1m as well as expenditure under a supplementary estimate of €44.2 for An Garda Síochána.

### What has been delivered?

The following section lists the latest headline figures for the justice sector in Ireland.

|                              |   | An Garda                 | Síochána €1,668.6m  |                          |  |

**Note 1.** The figure contained in the 'Revised Estimates for Public Services 2018' for 2016 in respect of this metric is 57% (the respective footnote notes this figure was sourced from the Garda 'Public Attitudes Survey'). However, the Garda 'Public Attitudes Survey' for 2016 (p.41) shows the correct figure to be 50% https://www.garda.ie/en/Information-Centre/Quarterly-Public-Attitudes-Surveys/An-Garda-Siochana-Public-Attitudes-Survey-2016.pdf.

**Note 2.** The Protective Services Initiative (part of An Garda Síochána's Modernisation and Renewal Programme 2016-2021) commenced in 2017 to establish Protective Services Units at divisional level. Previous to 2017, only the Garda National Protective Services Bureau existed.

**Note 3.** Figure provided reflects the number of vehicles allocated which was higher in 2016 as expenditure amounted to some €9,993,000 compared with €5,645,000 in 2017. Under the Government Capital Plan 2016 – 2021, €46 million is being invested in a modern, effective and fit-for-purpose Garda fleet over the lifetime of the plan. 65% of the fleet is less than 4 years old at end 2017.

<sup>\*</sup>Compared to 2016 output outturn published in REV 2018.

<sup>\*\*</sup>A large number of visitors attended 1916 centenary events in 2016, accounting for some of the reduction in numbers in 2017.

<sup>\*\*\*</sup>Figures are reduced from 2016 - the figures for 2016 refer to the previous 2007-13 round which has now closed, figures for 2017 refer to the 2014-20 round and for which drawdown has just commenced.

<sup>\*\*\*\*</sup>The number of applications varies from year to year depending on competition advertisement dates and number of large and mid-volume competitions.

<sup>\*\*\*\*\*</sup> The 58% figure includes all professional and technical campaigns up to the stage where the first candidate is assigned by PAS.

<sup>\*\*\*\*\*\* 41%</sup> of the 61 State Board campaigns in 2017 resulted in names submitted to Minister within 8 weeks.

<sup>\*</sup>Using updated 2016 figures as compared to 2016 Report for accurate trend analysis
\*\*With the absence of a NI Executive and specifically a First and Deputy First Minister since January

2017 the North South Ministerial Council (NSMC) cannot meet.

\*\*\*Updated working. Previously: External and Internal Gender Perspective Funded Projects.

\*\*\*\*In addition to the visits at HOSG level, Ireland received 12 additional very high-level visits (for example the Prince of Wales & Duchess of Cornwall, and former President of Finland Mr. Matti Ahtisaari), which is separate again to the number of visits received at Foreign Minister level.

\*\*\*\*\* Provisional figures

\*\*\*\*\*\* Previously known as the Asia Markets Fund

\*\*\*\*\*\*\* The drop from last year's total is largely explained by changes in approach to measuring attendance at Africa Day, this having evolved from a broad estimate of 30,000 visitors in 2016 to a more accurate count of c. 17,000 attendees at the 2017 event (with weather also playing an important role in total attendance figures)

## Communications, Climate Action & Environment

## At a glance:

**Gross Expenditure** €502.9m

Staff (FTE at end Q4)

 Civil Servants 373 Public Servants 1,045

8\* Non-Commercial State Bodies

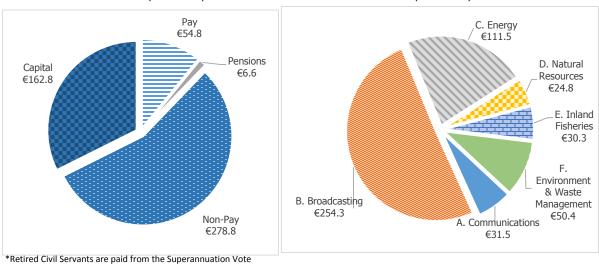

Pay Bill (% of Gross Current €54.8m (16.1%) Expenditure)

**Administrative Costs** €27.1m

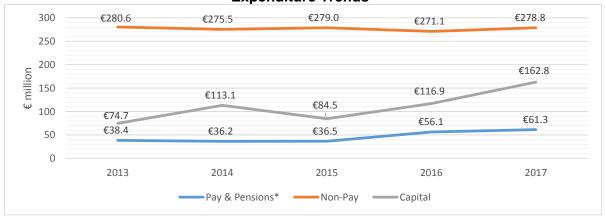

## **Composition of Expenditure**

Pay, Pensions\*, Capital and Non-Pay Breakdown (€ million)

## Expenditure by Programme (€ million)

### **Expenditure Trends\*\***

<sup>\*\*</sup>Note: The Department was renamed the Department of Communications, Climate Action and Environment with effect from 23rd July 2016. Environment functions were transferred from the Housing, Planning, Community and Local Government 22nd July 2016 which may cause some disparity in the above chart.

<sup>\*</sup> Inland Fisheries Ireland, Sustainable Energy Ireland, Digital Hub Development Agency, Environmental Protection Agency, Commission for Communication Regulation, Commission for Energy Regulation, National Oil Reserves Agency, Broadcasting Authority of Ireland.

<sup>\*\*</sup>Note: The Department operated as the Department of Arts, Heritage, Regional, Rural and Gaeltacht Affairs for the period from 9 June 2016 until 27 July 2017. Responsibility for Regional and Rural Affairs transferred to the new Department of Rural and Community Development on the 27 July 2017. The Department was renamed the Department of Culture, Heritage and the Gaeltacht with effect from 1 August 2017. This may cause some disparity in the above chart.

## Part 3 – Equality Reporting

## What is Equality Reporting?

The ongoing work regarding Equality Reporting in Ireland follows the Programme for a Partnership Government commitment to 'develop the process of budget and policy proofing as a means of advancing equality, reducing poverty and strengthening economic and social rights'. The Programme for Partnership Government also includes a commitment to 'ensure the institutional arrangements are in place to support equality and gender proofing within key government departments'. The National Strategy for Women and Girls 2017-2020 contains a further commitment to 'Take measures to build capacity within the Civil and Public Service with regard to gender mainstreaming and gender budgeting'.

Equality reporting involves providing greater information on the likely impacts of proposed and/or ongoing budgetary measures, which, in turn, enhances the potential to better facilitate the integration of equality concerns into the budgetary process and enhance the Government's decision-making framework.

Equality reporting is a process in which the budget is recognised as something more than a neutral process of resource allocation, but is considered a value laden process that embodies — and potentially informs and influences — long standing societal choices about how resources are deployed. It is not about creating a separate and distinct budget for specific equality measures. Rather, it is about the equality impact of budget policy and of the entire revenue and expenditure of a government.

Many elements that are crucial to good equality or gender budgeting, are equally so for good budgeting and good policy formulation more generally: notably the need for clear, multi-dimensional budgetary impact analyses, and the need for evaluation frameworks that feed directly into the policy and budget cycle. The intention is to anchor equality reporting into the existing budgetary framework.

## Irish Approach

Reflecting the availability of relevant studies and international comparator countries, the established track-record of seeking to gender-proof policy initiatives and the fact that analytical research carried out in the area of gender-responsive budgeting can be generalisable to other equality dimensions (e.g. age and ethnicity), it was decided to focus, at least initially, on the equality dimension of gender<sup>1</sup>.

The OECD estimates that 90 countries have experimented with some form of gender budgeting over the past decade. From a practical perspective it is also deemed more effective, at least initially, to concentrate on a single or limited number of equality characteristics for which disaggregated data may be more readily available. The learning from this pilot approach will be applied to other equality dimensions.

International experience has shown that there is no one size fits all model regarding equality or gender budgeting. The approach taken in Ireland draws from international experience and would perhaps most closely resemble the approach adopted in Austria to the introduction of gender budgeting at a federal level in 2013, as part of the performance based budgeting framework codified in the budget law.

The Austrian initiative is focused on addressing perceived gender inequalities and requires every line ministry in the federal government to include within its chapter in the Annual Budget Statement at least one gender related objective out of a maximum of five objectives that can be included. The outcome objectives are then related to specific tasks and performance indicators.

## **Pilot Programme of Equality Reporting**

The pilot programme of equality reporting for the 2018 budgetary cycle is anchored in the existing performance budgeting framework. For the first cycle of equality

<sup>&</sup>lt;sup>1</sup> As outlined below however the submission from the Department of Health looks at social class, helping to develop a focus on other equality dimensions as will be required going forward.

budgeting, a number of diverse policy areas have been selected with associated objectives and indicators published in the Revised Estimates Volume (REV) 2018. The relevant policy areas are:

- Education and Skills Programme B Skills Development
- Business, Enterprise and Innovation Programme B Innovation
- Transport, Tourism and Sport Programme D Sports and Recreation Services
- Culture, Heritage and the Gaeltacht A Arts, Culture and Film
- Health Health and Wellbeing
- Children and Youth Affairs Programme B Sectoral Programmes for Children and Young People

In advance of the publication of the REV each Department participating in the pilot programme of equality reporting conducted an assessment of their relevant policy programme and articulated a high level equality objective. To support the achievement of this high level objective, related performance indicators and targets were selected by each Department.

Responsibility for proofing expenditure programmes and the selection indicators and progress towards achieving the high level goals articulated is a matter for the individual spending Departments in the first instance. The role of the Department of Public Expenditure and Reform is to facilitate the initiative and provide support for Departments to fulfil the Programme for Government commitment.

The intention is that the publication of high level objectives and associated indicators will enhance transparency around the progress towards achieving equality objectives.

## **Progress to date**

All departments participating in the Equality Reporting pilot were asked to provide updates to be included in this report. While all departments are reporting positive progress, at this early stage of the year data is not available on all objectives.

## **Department of Children and Youth Affairs**

Programme Name: Childcare support schemes (CCS, TEC, ACS, ECCE)

**High Level Goal:** Make childcare more affordable so as to reduce the barriers to women's labour market participation (in addition to supporting other high-level goals, which include positive child outcomes, narrowing the attainment gap, and poverty reduction).

## **Key messages**

- The number of children receiving financial support under CCS/TEC (71,418)
  has already exceeded the sub-target for 2018 of 70,000. DCYA considers
  that it is likely to deliver ECCE to 114,000 children in September 2018. As
  such, DCYA views that it is on target to meet the 2018 output target (1) of
  184,000 children receiving financial support under childcare support
  schemes.
- The number of childcare services in contract to deliver childcare programmes is 4,517, exceeding the 2018 output target (2) of 4,450.

### Actions undertaken in Q1 2018

Significant changes were made to childcare subsidies in September 2017, which continued to be implemented in Q1 2018. While there were no further adjustments to subsidies in Q1 2018, take-up of subsidies by both childcare providers and parents, which rose significantly as a result of the September 2017 measures, continued to rise right through Q1 2018.

The September 2017 changes to CCS and TEC subsidies included:

- Up to 50% increases in targeted subsidy-rates.
- The introduction for the first time of a universal subsidy for children who are under 3 years old (or who are older than 3 but do not yet qualify for the ECCE programme) and who do not qualify for targeted subsidy-rates.

The September 2017 changes were accompanied by a communications campaign to raise awareness among parents of their eligibility to childcare subsidies.

### As a result of these actions:

- The number of childcare services in contract to deliver CCS/TEC increased from 2,168 at the end of July 2017 to 3,423 by the end of December 2017, and reached 3,428 by the end of Q1 2018.
- The number of children receiving financial support under CCS/TEC increased from 32,403 at the end of July 2017 to 61,939 by the end of December 2017, and has continued to increase to 71,418 by end of Q1 2018.

The total number of childcare services in contract to deliver any childcare programme (CCS, TEC or ECCE) was 4,517 at the end of Q1 2018, exceeding the 2018 target of 4,450.

The number of children receiving financial support under CCS/TEC has already exceeded the sub-target for 2018 of 70,000.

The number of children receiving support under ECCE was 110,588 at the end of Q1. This figure is not comparable with the 114,000 sub-target for the ECCE scheme for 2018, as the ECCE eligibility rules will change in September 2018 <sup>2</sup> and the target relates to the period September-December 2018, to allow comparability with future years.

Combining the figures for ECCE, CCS and TEC, the total number of children receiving financial support at the end of Q1 2018 was 182,006.

While uncertainty remains as to the number of children that will participate in ECCE in September-December 2018, the rapid increase in take-up of the CCS and TEC schemes indicates that the 2018 target of 184,000 children receiving financial support is likely to be met.

<sup>2</sup> Currently there are 3 annual intakes into ECCE (September, January and April) and children qualify for ECCE at the next intake after their 3<sup>rd</sup> birthday. From September 2018, there will be a single annual intake (in September each year) and children will qualify for ECCE at the September after they turn 2 years 8 months.

Data on childcare fees and on availability of full-time places is updated annually. It will therefore not be possible to assess progress against the 2018 output targets (3), (4) and (5) until Q3 or Q4 2018. Overall, the observed increases to scheme take-up and subsidy-rates will contribute to the affordability and availability of childcare, facilitating the removal of barriers to women's labour market participation.

## **Department of Transport, Tourism and Sport**

## National Governing Bodies:

- 26 NGBs were awarded Women in Sport funding as part of the February 1st 2018 announcements.
- Funding is released to NGBs in line with Sport Ireland financial procedures. Programmes and initiatives are underway as per the plans submitted by the NGBs.
- It should be noted that the information attached for previous years (2015, 2016 and 2017) is not the full allocation of the Women in Sport Investment.
- €600,000 was released to the core NGBs under the scheme however additional allocations went to the Field Sports (IRFU and FAI) and the Local Sports Partnership Network.

## Total figures are as follows:

| Women In Sport Funding 2015 - 2017 |          |          |          |  |
|------------------------------------|----------|----------|----------|--|
|                                    | 2015     | 2016     | 2017     |  |
| Core NGB                           | €600,000 | €600,000 | €600,000 |  |
| Field Sport                        | €256,500 | €256,500 | €256,500 |  |
| Local Sports Partnership           | €115,000 | €114,700 | €115,000 |  |
| Total                              | €971,500 | €971,200 | €971,500 |  |

## **Local Sports Partnership:**

- This funds sport and physical activity programmes for female target groups including women with a disability, women in disadvantaged communities, older women and teenage girls.
- This funding is ring-fenced for delivery across Sport Ireland's network of Local Sports Partnerships across a wide variety of locally developed programmes.

Total figures are as follows:

|      | Local Sports Partnership Women in Sport<br>Funding 2015 - 2017 |          |          |  |
|------|--|----------|----------|--|
| Year | 2015   | 2016     | 2017     |  |
| WIS  | €115,000   | €114,700 | €115,000 |  |

Ratio of Female to Male participants in sport as measured by the Irish Sports Monitor Irish Sports Monitor Report:

## **Observations:**

- The 2017 figures will be slightly different to those published in the 2015 Irish Sports Monitor Report.
- From 2015 both mobile and landline users will be surveyed and figures were adjusted to account for this change in methodology.
- Based on the 2017 Irish Sports Monitor figures we are on track to achieve the 2018 targets.

Total figures are as follows:

|   | Male sports participants % | Female sports participants % | Ratio of female<br>to male sports<br>participants |
|---|----------------------------|------------------------------|---|
| 2017 Irish Sports<br>Monitor (full year<br>unpublished) | 45.3%                      | 40.8%                        | 0.93  |
| 2015 Irish Sports<br>Monitor                            | 47.8%                      | 40.2%                        | 0.87  |

## **Department of Health**

The goal of the Department of Health's equality reporting target is to reduce the overall prevalence of smoking in the population, and in particular to narrow the gap between the highest and lowest social class groupings. This is a key public health and wellbeing goal reflected in the national Tobacco Free Ireland policy and the Healthy Ireland Framework.

The key high level metrics are (a) smoking prevalence (% population aged 15 and over who are current smokers); and (b) the gap between smoking prevalence in social class 1+2 and in social class 5+6. The source for both of these metrics is the annual Healthy Ireland Survey. This is an annual survey conducted by Ipsos MRBI on behalf of the Department, which involves in-home, face-to-face interviews with a sample of approximately 7,400 individuals representative of the Irish population aged 15 and over.

The Survey report is published each autumn, typically in October, and only annual data is available, i.e. the data is not collected on a quarterly or any other basis. The smoking prevalence in 2017 was 22% and the gap between highest and lowest social classes in 2017 was 16%. The next available figures will be in the report planned for publication in October 2018 (fieldwork is in final stages currently). Further information about the Survey and the annual report findings are available at: www.healthyireland.ie/accessibility/healthy-ireland-survey.

In terms of actions being undertaken to achieve these targets, this would, in broadest terms be the implementation of the Tobacco Free Ireland Policy. A report on implementation of the Tobacco Free Ireland Action Plan is published annually (link below to 2016 report published in November 2017): <a href="http://health.gov.ie/blog/publications/2016-annual-report-on-the-tobacco-free-ireland-action-plan/">http://health.gov.ie/blog/publications/2016-annual-report-on-the-tobacco-free-ireland-action-plan/</a>.

The two key themes underpinning Tobacco Free Ireland are the protection of children, and the denormalisation of smoking. As will be appreciated, when it comes

to addressing a significant public health and societal challenge such as tobacco, there is a multi-faceted approach taken including legislation, promotion of public awareness and behaviour change, provision of smoking cessation services such as the national QUIT service, and raising taxes on tobacco products.

In addition to the general increase in excise duty on all tobacco products, the narrowing of the price differential between cigarettes and 'roll your own' tobacco products (which are substantially cheaper than manufactured cigarettes) is important in order to reduce the attractiveness of these products to younger people.

Healthy Ireland Survey 2017 showed that smoking prevalence in young people (aged 15-24) is broadly in line with smoking rates in the population as a whole, which highlights the particular challenge of not just encouraging smokers to quit, but of preventing young people from smoking in the first place. The social gradient in respect of smoking is a further concern factor, with almost half of all young people who are unemployed being smokers.

## **Department of Business, Enterprise and Innovation**

The data cleaning and validation of the Science Foundation Ireland 2017 Census of Award Holders are still ongoing so it is not possible to update the 2017 figure at present. This will be available by the end of Q2, at which point it will become clearer on the likelihood of meeting 2018 targets.

The fact that this extensive and exhaustive data validation process occurs on an annual basis in Q1 of each year means that accurate quarterly updates are not possible. As a result our 2018 figures will not be available until Q1/Q2 2019.

Many of the actions SFI are exploring to achieve the 2018 output target will be highly dependent on budget and which programmes can be run in-year but the main gender equality action carried out in Q1 of 2018 was to launch the early-career Starting Investigator Research Grant (SIRG) Programme, which incentivises the Research Bodies to nominate excellent female candidates according to the following conditions:

Eligible research bodies may nominate up to a maximum of 12 candidates, who may then submit a proposal to the SIRG 2018 call. A maximum of six candidates out of the 12 allowed from each eligible Research Body may be male candidates.

Upon submission to SFI all applications are treated equally regardless of the gender of the applicant. This gender initiative previously resulted in an increase in the number of female awardees from 27% in 2013 to 54% in 2015.

## **Department of Education and Skills**

SOLAS is engaged with research to identify barriers to participation in apprenticeships amongst diverse groups, including women and girls. The review is to be completed in Q2 2018, however, initial findings of this research to date suggested a number of recommendations/actions including (but not limited to):

- Featuring women prominently in add. campaigns, securing articles/broadcasts
- Encourage ETBs, Training Centres and IoTs to raise awareness of apprenticeships to women and girls including by running open days targeted at women and girls
- With partners, develop a set of guidelines of equity in recruitment and market the existing female bursary to employers where appropriate
- Increase the active promotion of females in apprenticeships via social media

This work will also build on the positive evidence that increasing numbers of women are choosing apprenticeships:

- · 2015 26 female apprentices
- · 2016 60 female apprentices
- · 2017 145 female apprentices

At the end of Q1 2018 153 females are currently undertaking an apprenticeship.

It is likely that the target of 300 female participants for 2018 will be reached largely by means of the relatively high female participation rate on some of the newer apprenticeships that are currently in operation. These include, for example, existing apprenticeships in Accounting Technician, International Financial Services, and Insurance Practice which had 44% female participation on the 2017 intake, as well as other apprenticeships coming on stream that are expected to show strong female participation such as ICT, Retail Practice and Auctioneering and Property Services.

However, most of these new apprenticeships recruit in line with the academic year and so the full extent of female participation on these apprenticeships will be reflected in Q3/Q4 figures.

## Department of Culture, Heritage and the Gaeltacht

## Irish Film Board Indicators – April 2018

## 1. Output Update

The Irish Film Board (IFB) has undertaken to deliver a 5% increase (over 2017 output) in applications received and successful applications by projects with female writers, directors and/or producers attached to them. To date, the IFB has delivered 64% of its target for increasing the level of applications with female talent attached and 66% of successful applications. In absolute terms, this means these are the stats for awards of funding for Q1 2018. In terms of context, the total number of applications received was 50 and the number of successful applications was 26.

## A. Key High Level Metrics:

|   |   | 2018 Output Target |
|---|---|--------------------|
| 1 | Description of Indicator                                    | Quantitative       |
| ' | Description of indicator                                    | Target             |
| 2 | Level of applications received with female talent* attached | 64% (50)           |
| 3 | Level of successful applications with                       |                    |
|   | female talent* attached                                     | 66% (26)           |

<sup>\*</sup>writers, producers and directors

## 2. Actions taken by the IFB in 2018

The Irish Film Board is committed to supporting and facilitating an increase in the level of female writers, producers and directors in line with its Six Point Plan on Gender Equality. In 2018, the Board launched a new scheme called 'POV' which aims to support the development and production of low budget action feature films

from female writers and directors. An information session for POV was held on 28 March 2018 and the IFB is currently accepting applications online for the scheme. The deadline is the 20 April 2018. Further details are available at the following link: <a href="https://www.irishfilmboard.ie/funding/production-loans/pov-low-budget-production-and-training-scheme-for-female-talent">https://www.irishfilmboard.ie/funding/production-loans/pov-low-budget-production-and-training-scheme-for-female-talent</a>

The Board also established a Gender and Diversity Committee which comprises four Board members. Through positive communication, the vision of the committee is to lead the film and screen industry in bridging the gender gap and diversity deficit. The committee aims to do this by engaging a broad stakeholder map and driving the Board's Six Point Plan on Gender Equality. The committee meets quarterly and met in March 2018.

### **Next steps**

The pilot programme of equality reporting will be reviewed following the 2018 budgetary cycle. Learning from the pilot approach will be used to expand the initiative to other expenditure programmes and equality dimensions for the 2019 budgetary cycle.

To further guide the roll-out of equality reporting it is intended to establish an Equality Reporting Steering Group in Q2 2018. This group will be comprised of relevant stakeholders and policy experts to provide advice on the most effective way to advance the initiative going forward.
