Re: Future Development of Waterford Airport

To whom it may concern:

Dungarvan and West Waterford Chamber of Commerce would like to put on the record our support of the future development of Waterford Airport.

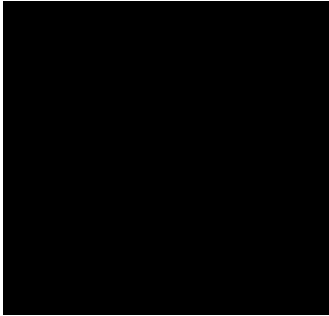

With the North Quays Development Project, hopefully a new South East University, our fabulous Greenway, our existing businesses and everything Waterford and the South East has and will soon have to offer, it is only right that we have an airport to be proud of.

We applaud the private investors who are being asked to put up €5m to help extend the runway at Waterford Airport and for their foresight and belief in Waterford as a business destination. We are pleased also to hear that central government and local authorities will contribute up a further €7m, to restart commercial flights in our region.

We welcome the fact that once the runway is extended, the airport will be able to accommodate large commercial passenger aircraft, which will add the potential for considerable numbers of routes and visitors to our region.

Dungarvan and West Waterford Chamber of Commerce welcome the development of Waterford Airport and look forward to scheduled flights returning to Waterford. Many of our member businesses will benefit from the arrival of tourists to our region and the feedback from membership is that Waterford Airport is a must for our region.

Yours Sincerely

Dungarvan & West Waterford Chamber
