

Dear Deputy,

It is now the month of May 2018, a time of renewal, growth and vibrancy here around the Great Western Lakes. It is the season of the Mayfly.

A fly that attracts thousands of anglers from home and abroad to our local communities to fish for our world famous brown trout.

This allure has been sustained by generations of anglers. Wild Brown Trout are the attraction.

Without this native indigenous species those people would not come and there would be no Mayfly season or the banter and crack that is part of the Mayfly season.

This is why Minister Sean Kyne's Designated Salmonid Waters Bye-law 2018 is so important in that it aims to protect the native brown trout and all it entails around the Great Western Lakes even down to children picking mayflies and making a few euro.

We seek your support for this Bye-Law as a means to protecting a National Treasure that is the envy of many.

If this is lost through the indifference of politicians it will never be reclaimed.

Yours sincerely,

20/5/2018

A Chara,

I am writing in support of the Designated Salmonid Waters Bye -Law 2018 as proposed by Minister Sean Kyne T.D.

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

Pike are the apex predator of both species and without adequate and proper control will decimate both populations.

It's for these reasons I support for this bye- law.

Mise le meas,

Dear Deputy,

We are writing to you requesting your support for Minister Sean Kyne's Designated Salmonid Waters Bye – Law 2018.

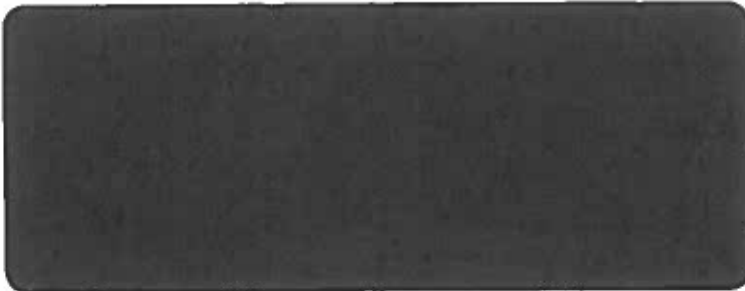

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

Re: - Designated Salmonid Waters Bye Law 2018

Dear Deputy,

I am seeking your support to ensure the safe passage of the Designated Salmonid Waters Bye Law 2018.

This Bye Law is essential in safeguarding Trout stocks in our Designated Wild Brown Trout Fisheries. There are fourteen Designated Wild Brown Trout Fisheries left in Europe thirteen of which are in Ireland.

All of the eminent scientists agree that.

- Brown Trout is an indigenous species to Ireland here since the Ice Age.
- Pike is a predator and needs to be controlled on Designated Wild Brown Trout Fisheries.
- The Preferred diet of Pike is Trout.
- The unlawful introduction of Pike into Brown Trout Fisheries has resulted in the near extinction of the native Brown Trout in those waters.
- Pike is regarded as Invasive.
- There are over Eight Thousand Pike fisheries in Ireland

While I support this Bye Law on Designated Salmonid Waters I would have wished it had been extended to all Designated Salmonid Waters rather than just seven.

I respectfully ask your support to ensure this Bye Law makes it on to the Statue books

Yours Sincerely,

Inland Fisheries Division

To whom it may concern,

I wholeheartedly support the proposed Bye Law which will provide the necessary Laws to Designate the 7 named lakes as Salmonid Waters and the daily bag limit of 4 pike per day.

This By-Law is essential to the survival of the Internationally Recognised Brown Trout Fisheries. The fisheries are some of the few remaining Brown Trout fisheries which we have the opportunity to save for future generations of Irish Anglers. These Fisheries are a National Asset which must be protected.

Yours Sincerely

Re: Designated Salmonid Waters Bye Law 2018

I wish to express my full support for Minister Sean Kyne regarding the introduction of this Bye Law.

Furthermore, I believe that additional measures should be taken to protect our indigenous Salmonid species.

- 1. There should be no bag limit on pike in designated salmonid waters, as these predators have been the cause of the extermination of salmonids throughout the world.**
- 2. All the designated wild brown trout fisheries should be given the same legislative protection under this Bye Law.**
- 3. There should be two distinctly separate boards overseeing the game and coarse fisheries, with the board overseeing trout and salmon fisheries being geographically located along the western seaboard.**
- 4. The close season as it applies to trout and salmon angling in the Designated Salmonid Waters, should equally apply to all angling activities.**

Yours Sincerely

Dear Deputy,

It is now the month of May 2018, a time of renewal, growth and vibrancy here around the Great Western Lakes. It is the season of the Mayfly.

A fly that attracts thousands of anglers from home and abroad to our local communities to fish for our world famous brown trout.

This allure has been sustained by generations of anglers. Wild Brown Trout are the attraction.

Without this native indigenous species those people would not come and there would be no Mayfly season or the banter and crack that is part of the Mayfly season.

This is why Minister Sean Kyne's Designated Salmonid Waters Bye-law 2018 is so important in that it aims to protect the native brown trout and all it entails around the Great Western Lakes even down to children picking mayflies and making a few euro.

We seek your support for this Bye-Law as a means to protecting a National Treasure that is the envy of many.

If this is lost through the indifference of politicians it will never be reclaimed.

Yours sincerely,

Inland Fisheries Division

20/5/2018

A Chara,

I am writing in support of the Designated Salmonid Waters Bye -Law 2018 as proposed by Minister Sean Kyne T.D.

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

Pike are the apex predator of both species and without adequate and proper control will decimate both populations.

It's for these reasons I support for this bye- law.

A Chara,

I am delighted and fully support the Designated Salmonid Waters Bye -Law 2018 as proposed by Minister Sean Kyne T.D.

Legislation is needed to protect the Great Western Lakes as Wild Brown Fisheries and also to protect the Wild Atlantic Salmon, an endangered species.

The bag limit for pike should be unrestricted as these are world famous brown trout fisheries and pike are detrimental to their wellbeing.

Unless these waters are properly protected from pike they will disappear in our lifetime as renowned brown trout fisheries.

Re: - Designated Salmonid Waters Bye Law 2018

Dear Deputy,

I am seeking your support to ensure the safe passage of the Designated Salmonid Waters Bye Law 2018.

This Bye Law is essential in safeguarding Trout stocks in our Designated Wild Brown Trout Fisheries. There are fourteen Designated Wild Brown Trout Fisheries left in Europe thirteen of which are in Ireland.

All of the eminent scientists agree that.

- Brown Trout is an indigenous species to Ireland here since the Ice Age.
- Pike is a predator and needs to be controlled on Designated Wild Brown Trout Fisheries.
- The Preferred diet of Pike is Trout.
- The unlawful introduction of Pike into Brown Trout Fisheries has resulted in the near extinction of the native Brown Trout in those waters.
- Pike is regarded as Invasive.
- There are over Eight Thousand Pike fisheries in Ireland

While I support this Bye Law on Designated Salmonid Waters I would have wished it had been extended to all Designated Salmonid Waters rather than just seven.

I respectfully ask your support to ensure this Bye Law makes it on to the Statue books

Yours Sincerely,

Inland Fisheries Division

A Chara,

I am writing in support of the Designated Salmonid Waters Bye -Law 2018 as proposed by Minister Sean Kyne T.D.

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

Pike are the apex predator of both species and without adequate and proper control will decimate both populations.

It's for these reasons I support for this bye- law.

Mise le meas,

Dear Deputy,

It is now the month of May 2018, a time of renewal, growth and vibrancy here around the Great Western Lakes. It is the season of the Mayfly.

A fly that attracts thousands of anglers from home and abroad to our local communities to fish for our world famous brown trout.

This allure has been sustained by generations of anglers. Wild Brown Trout are the attraction.

Without this native indigenous species those people would not come and there would be no Mayfly season or the banter and crack that is part of the Mayfly season.

This is why Minister Sean Kyne's Designated Salmonid Waters Bye-law 2018 is so important in that it aims to protect the native brown trout and all it entails around the Great Western Lakes even down to children picking mayflies and making a few euro.

We seek your support for this Bye-Law as a means to protecting a National Treasure that is the envy of many.

If this is lost through the indifference of politicians it will never be reclaimed.

Yours sincerely,

A Chara,

I am delighted and fully support the Designated Salmonid Waters Bye -Law 2018 as proposed by Minister Sean Kyne T.D.

Legislation is needed to protect the Great Western Lakes as Wild Brown Fisheries and also to protect the Wild Atlantic Salmon, an endangered species.

The bag limit for pike should be unrestricted as these are world famous brown trout fisheries and pike are detrimental to their wellbeing.

Unless these waters are properly protected from pike they will disappear in our lifetime as renowned brown trout fisheries.

Pike are the apex predator of both species and without adequate and proper control will decimate both populations.

It's for these reasons we seek your support for this bye-law.

Yours sincerely

Dear Deputy,

It is now the month of May 2018, a time of renewal, growth and vibrancy here around the Great Western Lakes. It is the season of the Mayfly.

A fly that attracts thousands of anglers from home and abroad to our local communities to fish for our world famous brown trout.

This allure has been sustained by generations of anglers. Wild Brown Trout are the attraction.

Without this native indigenous species those people would not come and there would be no Mayfly season or the banter and crack that is part of the Mayfly season.

This is why Minister Sean Kyne's Designated Salmonid Waters Bye-law 2018 is so important in that it aims to protect the native brown trout and all it entails around the Great Western Lakes even down to children picking mayflies and making a few euro.

We seek your support for this Bye-Law as a means to protecting a National Treasure that is the envy of many.

If this is lost through the indifference of politicians it will never be reclaimed.

Yours sincerely,

Inland Fisheries Division

A Chara,

I am delighted and fully support the Designated Salmonid Waters Bye -Law 2018 as proposed by Minister Sean Kyne T.D.

Legislation is needed to protect the Great Western Lakes as Wild Brown Fisheries and also to protect the Wild Atlantic Salmon, an endangered species.

The bag limit for pike should be unrestricted as these are world famous brown trout fisheries and pike are detrimental to their wellbeing.

Unless these waters are properly protected from pike they will disappear in our lifetime as renowned brown trout fisheries.

Mise le meas,

Dear Deputy,

We are writing to you requesting your support for Minister Sean Kyne's Designated Salmonid Waters Bye - Law 2018.

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

Pike are the apex predator of both species and without adequate and proper control will decimate both populations.

It's for these reasons we seek your support for this bye- law.

Yours sincerely

A Chara,

I am delighted and fully support the Designated Salmonid Waters Bye -Law 2018 as proposed by Minister Sean Kyne T.D.

Legislation is needed to protect the Great Western Lakes as Wild Brown Fisheries and also to protect the Wild Atlantic Salmon, an endangered species.

The bag limit for pike should be unrestricted as these are world famous brown trout fisheries and pike are detrimental to their wellbeing.

Unless these waters are properly protected from pike they will disappear in our lifetime as renowned brown trout fisheries.

Mise le meas,

Dear Deputy,

It is now the month of May 2018, a time of renewal, growth and vibrancy here around the Great Western Lakes. It is the season of the Mayfly.

A fly that attracts thousands of anglers from home and abroad to our local communities to fish for our world famous brown trout.

This allure has been sustained by generations of anglers. Wild Brown Trout are the attraction.

Without this native indigenous species those people would not come and there would be no Mayfly season or the banter and crack that is part of the Mayfly season.

This is why Minister Sean Kyne's Designated Salmonid Waters Bye-law 2018 is so important in that it aims to protect the native brown trout and all it entails around the Great Western Lakes even down to children picking mayflies and making a few euro.

We seek your support for this Bye-Law as a means to protecting a National Treasure that is the envy of many.

If this is lost through the indifference of politicians it will never be reclaimed.

Yours sincerely,
