

Dear Deputy,

It is now the month of May 2018, a time of renewal, growth and vibrancy here around the Great Western Lakes. It is the season of the Mayfly.

A fly that attracts thousands of anglers from home and abroad to our local communities to fish for our world famous brown trout.

This allure has been sustained by generations of anglers. Wild Brown Trout are the attraction.

Without this native indigenous species those people would not come and there would be no Mayfly season or the banter and crack that is part of the Mayfly season.

This is why Minister Sean Kyne's Designated Salmonid Waters Bye-law 2018 is so important in that it aims to protect the native brown trout and all it entails around the Great Western Lakes even down to children picking mayflies and making a few euro.

We seek your support for this Bye-Law as a means to protecting a National Treasure that is the envy of many.

If this is lost through the indifference of politicians it will never be reclaimed.

Yours sincerely,

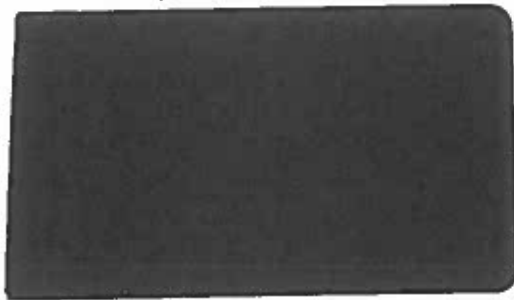

Sean Ryan, T.D.

Dear Minister

I wholeheartedly support the proposed Bye Law which will provide the necessary Laws to Designate the 7 named lakes as Salmonid Waters and the daily bag limit of 4 pike per day.

This By-Law is essential to the survival of the Internationally Recognised Brown Trout Fisheries. The fisheries are some of the few remaining Brown Trout fisheries which we have the opportunity to save for future generations of Irish Anglers. These Fisheries are a National Asset which must be protected

Yours Sincerely

A Chara,

I am delighted and fully support the Designated Salmonid Waters Bye -Law 2018 as proposed by Minister Sean Kyne T.D.

Legislation is needed to protect the Great Western Lakes as Wild Brown Fisheries and also to protect the Wild Atlantic Salmon, an endangered species.

The bag limit for pike should be unrestricted as these are world famous brown trout fisheries and pike are detrimental to their wellbeing.

Unless these waters are properly protected from pike they will disappear in our lifetime as renowned brown trout fisheries.

[REDACTED]

Dear Deputy,

We are writing to you requesting your support for Minister Sean Kyne's Designated Salmonid Waters Bye – Law 2018.

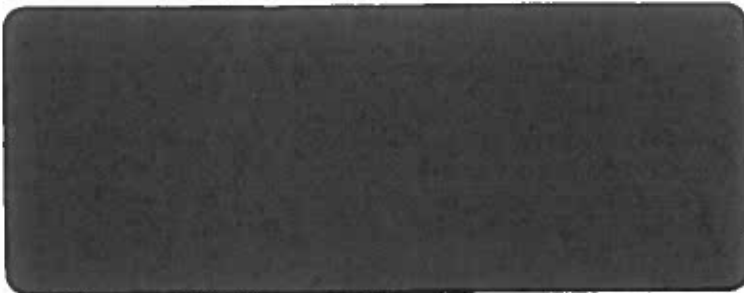

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

Pike are the apex predator of both species and without adequate and proper control will decimate both populations.

It's for these reasons we seek your support for this bye- law.

Yours sincerely
