

15th May 2018

**Re: - Designated Salmonid Waters Bye Law 2018**

Dear Deputy,

I am seeking your support to ensure the safe passage of the Designated Salmonid Waters Bye Law 2018.

This Bye Law is essential in safeguarding Trout stocks in our Designated Wild Brown Trout Fisheries. There are fourteen Designated Wild Brown Trout Fisheries left in Europe thirteen of which are in Ireland.

All of the eminent scientists agree that.

- Brown Trout is an indigenous species to Ireland here since the Ice Age.
- Pike is a predator and needs to be controlled on Designated Wild Brown Trout Fisheries.
- The Preferred diet of Pike is Trout.
- The unlawful introduction of Pike into Brown Trout Fisheries has resulted in the near extinction of the native Brown Trout in those waters.
- Pike is regarded as Invasive.
- There are over Eight Thousand Pike fisheries in Ireland

While I support this Bye Law on Designated Salmonid Waters I would have wished it had been extended to all Designated Salmonid Waters rather than just seven.

I respectfully ask your support to ensure this Bye Law makes it on to the Statue books

Yours Sincerely,

Dear Deputy,

We are writing to you requesting your support for Minister Sean Kyne's Designated Salmonid Waters Bye – Law 2018.

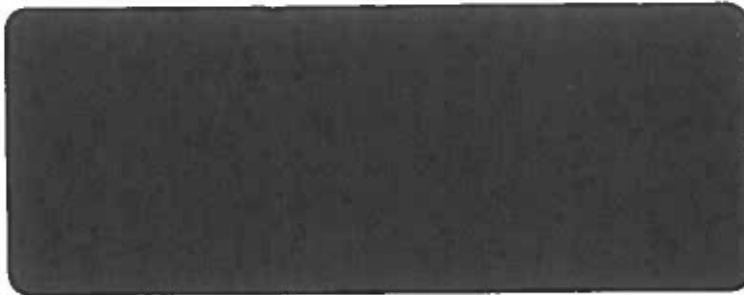

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

Pike are the apex predator of both species and without adequate and proper control will decimate both populations.

It's for these reasons we seek your support for this bye- law.

Yours sincerely

Dear Deputy,

It is now the month of May 2018, a time of renewal, growth and vibrancy here around the Great Western Lakes. It is the season of the Mayfly.

A fly that attracts thousands of anglers from home and abroad to our local communities to fish for our world famous brown trout.

This allure has been sustained by generations of anglers. Wild Brown Trout are the attraction.

Without this native indigenous species those people would not come and there would be no Mayfly season or the banter and crack that is part of the Mayfly season.

This is why Minister Sean Kyne's Designated Salmonid Waters Bye-law 2018 is so important in that it aims to protect the native brown trout and all it entails around the Great Western Lakes even down to children picking mayflies and making a few euro.

We seek your support for this Bye-Law as a means to protecting a National Treasure that is the envy of many.

If this is lost through the indifference of politicians it will never be reclaimed.

**Re: Designated Salmonid Waters Bye Law 2018**

**I wish to express my full support for Minister Sean Kyne regarding the introduction of this Bye Law.**

**Furthermore, I believe that additional measures should be taken to protect our indigenous Salmonid species.**

- 1. There should be no bag limit on pike in designated salmonid waters, as these predators have been the cause of the extermination of salmonids throughout the world.**
- 2. All the designated wild brown trout fisheries should be given the same legislative protection under this Bye Law.**
- 3. There should be two distinctly separate boards overseeing the game and coarse fisheries, with the board overseeing trout and salmon fisheries being geographically located along the western seaboard.**
- 4. The close season as it applies to trout and salmon angling in the Designated Salmonid Waters, should equally apply to all angling activities.**

**Yours Sincerely**

***Re: Designated salmonid Waters Bye-Law 2018***

Dear Minister,

Since its inception in 1953 the club has played a significant role in the development and conservation of Lough Corrib as a wild salmonid fishery. The club and its members have invested heavily in the development of mooring facilities in Pordarragh, Moycullen and the construction of three angling huts, two of which are open access. To date the club has invested significant funds in the development of the Oughterard hatchery for the supply of trout fry, the development of streams and the management of pike. These activities coupled with other Lough Corrib clubs have been critical to developing and maintaining Lough Corrib as a salmonid fishery, which is now recognised internationally as a unique World Class salmonid fishery. **The club welcomes the proposed Designated Salmonid bye-law by the Minister and as a significant stakeholder of lough Corrib the club and its members wishes to express its full support in its implementation.**

Sincerely

Dear Deputy,

We are writing to you requesting your support for Minister Sean Kyne's Designated Salmonid Waters Bye – Law 2018.

## **Re; Draft Bye-law to designate scheduled waters as salmonid waters**

Dear Mr Sean Kyne, T.D., Minister of State at the Department of Communications, Climate Action and Environment,

We wish to make a submission from Dublin Trout Anglers Association in support of your proposal to introduce a bye-law to designate scheduled waters as salmonid waters.

Dublin Trout Anglers welcomes the new designation proposed for the waters specified and their tributaries and distributaries. We welcome the management and protection measures proposed and consider them essential to protect the wild stock of native salmonid species in these waters.

In addition to the benefit to native Irish wild brown trout stock in these waters we believe these measures will represent an improvement to recreational angling in Ireland. This bye law will ensure that generations to come will still be able to sample wild Brown trout fishing.

We would also suggest that other waters be considered for addition to the schedule such as Lough Owel, Lough Ennell and Lough Lene, Co Westmeath.

Dublin Trout Anglers Association was established in 1929 and currently represents close to 300 members throughout Dublin. Dublin Trout Anglers Association are affiliated to ITFFA and NARA,

Yours sincerely,

---

On behalf of Dublin Trout Anglers Association

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

Pike are the apex predator of both species and without adequate and proper control will decimate both populations.

It's for these reasons we seek your support for this bye- law.

Yours sincerely

Sean Kyne, T.D.

Dear Minister

I wholeheartedly support the proposed Bye Law which will provide the necessary Laws to Designate the 7 named lakes as Salmonid Waters and the daily bag limit of 4 pike per day.

This By-Law is essential to the survival of the Internationally Recognised Brown Trout Fisheries. The fisheries are some of the few remaining Brown Trout fisheries which we have the opportunity to save for future generations of Irish Anglers. These Fisheries are a National Asset which must be protected.

Yours Sincerely

***Re: Designated salmonid Waters Bye-Law 2018***

Dear Minister,

Since its inception in 1953 the club has played a significant role in the development and conservation of Lough Corrib as a wild salmonid fishery. The club and its members have invested heavily in the development of mooring facilities in Pordarragh, Moycullen and the construction of three angling huts, two of which are open access. To date the club has invested significant funds in the development of the Oughterard hatchery for the supply of trout fry, the development of streams and the management of pike. These activities coupled with other Lough Corrib clubs have been critical to developing and maintaining Lough Corrib as a salmonid fishery, which is now recognised internationally as a unique World Class salmonid fishery. **The club welcomes the proposed Designated Salmonid bye-law by the Minister and as a significant stakeholder of lough Corrib the club and its members wishes to express its full support in its implementation.**

Sincerely

Sean Kyne, T.D.

Dear Minister

I wholeheartedly support the proposed Bye Law which will provide the necessary Laws to Designate the 7 named lakes as Salmonid Waters and the daily bag limit of 4 pike per day.

This By-Law is essential to the survival of the Internationally Recognised Brown Trout Fisheries. **Re: Designated Salmonid Waters Bye Law 2018**

**I wish to express my full support for Minister Sean Kyne regarding the introduction of this Bye Law.**

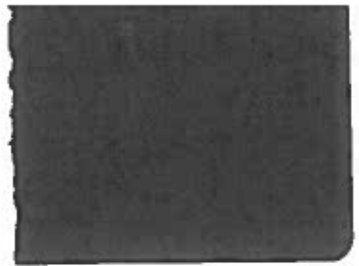

**Furthermore, I believe that additional measures should be taken to protect our indigenous Salmonid species.**

- 1. There should be no bag limit on pike in designated salmonid waters, as these predators have been the cause of the extermination of salmonids throughout the world.**
- 2. All the designated wild brown trout fisheries should be given the same legislative protection under this Bye Law.**
- 3. There should be two distinctly separate boards overseeing the game and coarse fisheries, with the board overseeing trout and salmon fisheries being geographically located along the western seaboard.**
- 4. The close season as it applies to trout and salmon angling in the Designated Salmonid Waters, should equally apply to all angling activities.**

**Yours Sincerely**

Dear Deputy,

It is now the month of May 2018, a time of renewal, growth and vibrancy here around the Great Western Lakes. It is the season of the Mayfly.

A fly that attracts thousands of anglers from home and abroad to our local communities to fish for our world famous brown trout.

This allure has been sustained by generations of anglers. Wild Brown Trout are the attraction.

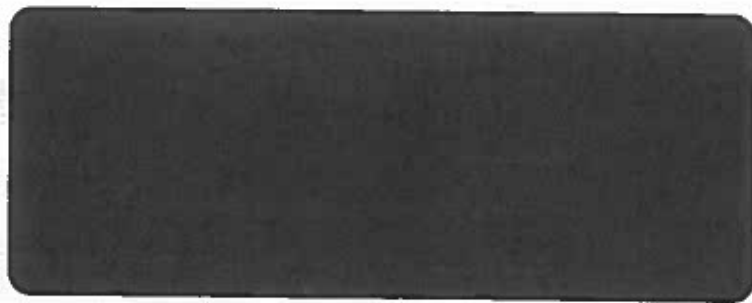

Without this native indigenous species those people would not come and there would be no Mayfly season or the banter and crack that is part of the Mayfly season.

This is why Minister Sean Kyne's Designated Salmonid Waters Bye-law 2018 is so important in that it aims to protect the native brown trout and all it entails around the Great Western Lakes even down to children picking mayflies and making a few euro.

We seek your support for this Bye-Law as a means to protecting a National Treasure that is the envy of many.

If this is lost through the indifference of politicians it will never be reclaimed.

Yours sincerely,

The loss of these waters is unthinkable and I fully support the Minister Sean Kyne's intention to make the Designated Salmonide Waters Bye-Law.

Mise le meas,

24/05/2018

Ref: Designated Salmonoid Waters Bye-Law 2018

To whom it may concern,

I wish to strongly support the proposal to designate the seven named Lough's and its tributaries as salmonoid waters so as to provide the maximum protection to our native stock. As a local resident in the Oughterard area I am acutely aware of the pressure on the waters of Lough Corrib and Owenriff system with pollution, invasive species and predators.

I believe that if the Bye Laws are not adopted and enacted that there will be an irreversible and catastrophic decline of salmonoids in the waters referenced and I would view this as completely unsustainable and deliberate destruction of the environment and the stock.

Please don't let this happen !!!!.

Signed

18/05/2018

Dear Minister

I support the introduction of the Designated Salmonid Waters Bye-Law 2018.

This Bye Law is essential in safeguarding Trout stocks in our Designated Wild Brown Trout Fisheries. There are fourteen Designated Wild Brown Trout Fisheries left in Europe thirteen of which are in Ireland. Seven are named in the Bye-Law.

- Brown Trout is an indigenous species to Ireland here since the Ice Age.
- Pike is a predator and needs to be controlled on Designated Wild Brown Trout Fisheries.
- The Preferred diet of Pike is Trout.
- The unlawful introduction of Pike into Brown Trout Fisheries has resulted in the near extinction of the native Brown Trout in those waters.
- Pike is regarded as Invasive.
- There are over Eight Thousand Pike fisheries in Ireland
- We must protect the few remaining Brown Trout Lakes for future Generations.
- These Lakes are important National Asset's and deserve every Protection Possible.

Yours Sincerely

Member of Angling Club

- Pike is regarded as Invasive.
- There are over Eight Thousand Pike fisheries in Ireland
- We must protect the few remaining Brown Trout Lakes for future Generations.
- These Lakes are important National Asset's and deserve every Protection Possible.

Yours Sincerely

Member of Angling Club

Dear Deputy,

We are writing to you requesting your support for Minister Sean Kyne's Designated Salmonid Waters Bye – Law 2018.

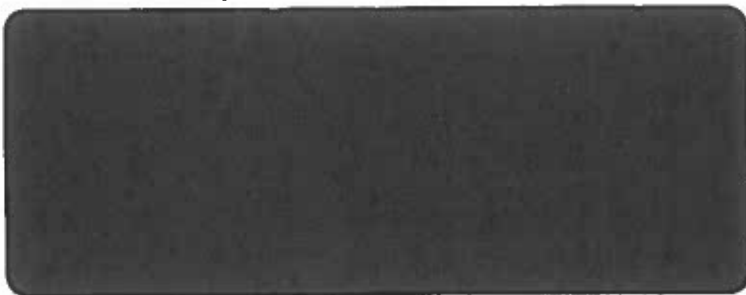

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

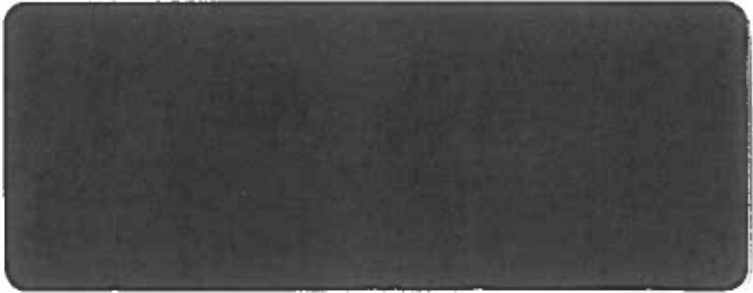

Pike are the apex predator of both species and without adequate and proper control will decimate both populations.

It's for these reasons we seek your support for this bye- law.

Yours sincerely

Attn: Inland Fisheries Division  
Department of Communications  
Climate Action and Environment  
Elm House  
Earlsvale Road  
Cavan Town  
H12 A8H7

To whom it may concern,

I wholeheartedly support the proposed Bye Law which will provide the necessary Laws to Designate the 7 named lakes as Salmonid Waters and the daily bag limit of 4 pike per day.

This By-Law is essential to the survival of the Internationally Recognised Brown Trout Fisheries. The fisheries are some of the few remaining Brown Trout fisheries which we have the opportunity to save for future generations of Irish Anglers. These Fisheries are a National Asset which must be protected.

Yours Sincerely

Inland Fisheries Division

***Re: Designated salmonid Waters Bye-Law 2018***

Dear Minister,

Since its inception in 1953 the club has played a significant role in the development and conservation of Lough Corrib as a wild salmonid fishery. The club and its members have invested heavily in the development of mooring facilities in Pordarragh, Moycullen and the construction of three angling huts, two of which are open access. To date the club has invested significant funds in the development of the Oughterard hatchery for the supply of trout fry, the development of streams and the management of pike. These activities coupled with other Lough Corrib clubs have been critical to developing and maintaining Lough Corrib as a salmonid fishery, which is now recognised internationally as a unique World Class salmonid fishery. **The club welcomes the proposed Designated Salmonid bye-law by the Minister and as a significant stakeholder of lough Corrib the club and its members wishes to express its full support in its implementation.**

Sincerely

Dear Deputy,

We are writing to you requesting your support for Minister Sean Kyne's Designated Salmonid Waters Bye – Law 2018.

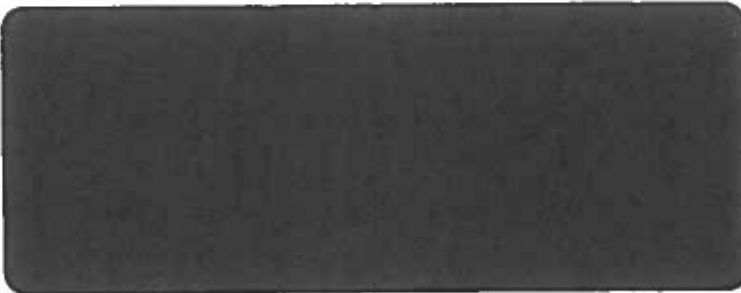

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

Pike are the apex predator of both species and without adequate and proper control will decimate both populations.

It's for these reasons we seek your support for this bye- law.

Yours sincerely

Dear Deputy,

It is now the month of May 2018, a time of renewal, growth and vibrancy here around the Great Western Lakes. It is the season of the Mayfly.

A fly that attracts thousands of anglers from home and abroad to our local communities to fish for our world famous brown trout.

This allure has been sustained by generations of anglers. Wild Brown Trout are the attraction.

Without this native indigenous species those people would not come and there would be no Mayfly season or the banter and crack that is part of the Mayfly season.

This is why Minister Sean Kyne's Designated Salmonid Waters Bye-law 2018 is so important in that it aims to protect the native brown trout and all it entails around the Great Western Lakes even down to children picking mayflies and making a few euro.

We seek your support for this Bye-Law as a means to protecting a National Treasure that is the envy of many.

If this is lost through the indifference of politicians it will never be reclaimed.

Yours sincerely,

Dear Deputy,

**Re: Designated Salmonid Waters Bye Law 2018**

**I wish to express my full support for Minister Sean Kyne regarding the introduction of this Bye Law.**

**Furthermore, I believe that additional measures should be taken to protect our indigenous Salmonid species.**

- 1. There should be no bag limit on pike in designated salmonid waters, as these predators have been the cause of the extermination of salmonids throughout the world.**
- 2. All the designated wild brown trout fisheries should be given the same legislative protection under this Bye Law.**
- 3. There should be two distinctly separate boards overseeing the game and coarse fisheries, with the board overseeing trout and salmon fisheries being geographically located along the western seaboard.**
- 4. The close season as it applies to trout and salmon angling in the Designated Salmonid Waters, should equally apply to all angling activities.**

**Yours Sincerely**

A Chara,

I support the Designated Salmonid Waters Bye -Law 2018 as proposed by Minister Sean Kyne T.D.

Legislation is needed to protect the Great Western Lakes as Wild Brown Fisheries and also to protect the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

I also feel that the bag limit should be 8 pike per rod per day, as pike are an invasive species.

Pike are predator of both species and without adequate and proper control will decimate both populations.

18/05/2018

Dear Minister

I support the introduction of the Designated Salmonid Waters Bye-Law 2018.

This Bye Law is essential in safeguarding Trout stocks in our Designated Wild Brown Trout Fisheries. There are fourteen Designated Wild Brown Trout Fisheries left in Europe thirteen of which are in Ireland. Seven are named in the Bye-Law.

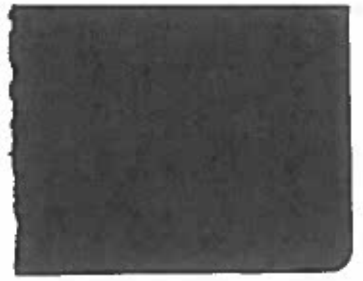

- Brown Trout is an indigenous species to Ireland here since the Ice Age.
- Pike is a predator and needs to be controlled on Designated Wild Brown Trout Fisheries.
- The Preferred diet of Pike is Trout.
- The unlawful introduction of Pike into Brown Trout Fisheries has resulted in the near extinction of the native Brown Trout in those waters.
- Pike is regarded as Invasive.
- There are over Eight Thousand Pike fisheries in Ireland
- We must protect the few remaining Brown Trout Lakes for future Generations.
- These Lakes are important National Asset's and deserve every Protection Possible.

Yours Sincerely

Member of Angling Club

Dear Minister

I support the introduction of the Designated Salmonid Waters Bye-Law 2018.

This Bye Law is essential in safeguarding Trout stocks in our Designated Wild Brown Trout Fisheries. There are fourteen Designated Wild Brown Trout Fisheries left in Europe thirteen of which are in Ireland. Seven are named in the Bye-Law.

- Brown Trout is an indigenous species to Ireland here since the Ice Age.
- Pike is a predator and needs to be controlled on Designated Wild Brown Trout Fisheries.
- The Preferred diet of Pike is Trout.
- The unlawful introduction of Pike into Brown Trout Fisheries has resulted in the near extinction of the native Brown Trout in those waters.
- Pike is regarded as Invasive.
- There are over Eight Thousand Pike fisheries in Ireland
- We must protect the few remaining Brown Trout Lakes for future Generations.
- These Lakes are important National Asset's and deserve every Protection Possible.

Yours Sincerely

Member of Angling Club

Dear Deputy,

We are writing to you requesting your support for Minister Sean Kyne's Designated Salmonid Waters Bye – Law 2018.

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

Pike are the apex predator of both species and without adequate and proper control will decimate both populations.

It's for these reasons we seek your support for this bye- law.

Yours sincerely

Member of Angling Club

Fellow anglers,

This notice of the Minister's intent to introduce a bye-law to increase the pike bag limit to four without size restriction, and to designate the major trout lakes containing pike as primary Salmonid waters is a welcome development. This is the final furlong in settling the pike control issue and it is no time to relax. There is a need to respond positively to the proposal and a short response will do, as all the arguments have been made already. If you do one thing tonight, get a response in. I'd suggest that you include some of the following, in your own words.

Welcome the minister's plan to designate prime trout waters as salmonid waters.

This is an enlightened/ far-seeing/ intelligent/ well-planned approach to our prime trout and salmon waters.

The proposed changes to predator control/ pike control are a move in the right direction. The position where a single law applied to all waters made no sense.

Each fishery has its own unique qualities. Rather than take a "one size fits all" approach, management of the fishery should be directed at developing what is the best in each fishery.

Name whatever lakes interest you most.

Thank you.

Lough Corrib Angling Federation.

I welcome the ministers plan to  
designated prime trout waters as  
salmonid waters

Corrib Trout

anglers.

Dear Deputy,

Dear Sirs.

Re. Designated Salmonoid Waters.  
Bye-law 2018

I welcome Sean Kyne, T.D. Minister of State, intention to designate the seven named game fishing waters Designated Salmonoid Waters Bye law. Millions of taxpayers money has been spent, over the past 50 years, by State Agencies in protecting and development of these waters, This designation will ensure that this important work will continue into the future. These wild trout fisheries are noted as the finest in Europe. Therefore must be given the ultimate protection in Irish Law.

Yours sincerely

Inland Fisheries Division  
Dept of Communications  
Climate Action & Environment.

Dear Sirs,

I wish to endorse the intention of Minister Sean Kyne to make the Designated Salmonid Waters Bye-law.

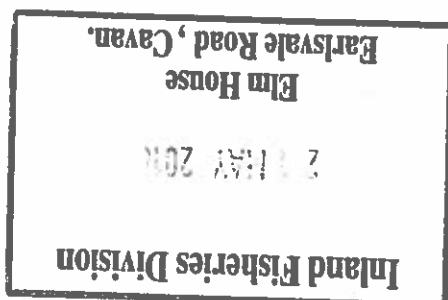

As a founder member of the Carru, Mask, Corrib Water Protection Group, I admire his wisdom in taking these steps.

My fellow anglers & I, have operated the Trout Hatchery in Tughterard, on a voluntary basis for the past 33 years. This hatchery produced over a quarter million, unfed trout fry, annually.

This designation could not come soon enough for these unique lakes. Lough Corrib & Lough Mask stand out as two of the finest wild game fisheries in Europe.

This Bye-law will safeguard our lakes for the future.

Yours sincerely

Inland Fisheries Division,

Re Gamefishing lakes

Dear Sirs,

We moved to Ireland in 2001 from England. One of the reasons was for the game fishing, which was fantastic up to recent now we are flooded out with Pike. It was yesterday I was speaking to a man from South Africa who was very upset about the Pike in Irish waters. He came here for his fishing. I know alot of people from England & USA. who thought Ireland had the best fishing waters in the World.

When I first came here Coughterard Club <sup>had</sup> 366 members in the Club, now we are lucky to get a 100. Every C. Club around the Conurb is the same, some clubs have packed up.

Its a shame that people are not coming to Ireland now because of Pike in our waters.

Yours Sincerely

P.S.

I welcome the Minister's Sean Kyne's wisdom to designate the Western game fishing lakes for even more and is going to be successful.

15/5/2018

A Chara,

I support the Designated Salmonid Waters Bye –Law 2018 as proposed by Minister Sean Kyne T.D.

Legislation is needed to protect the Great Western Lakes as Wild Brown Fisheries and also to protect the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

I also feel that the bag limit should be 8 pike per rod per day, as pike are an invasive species.

Pike are predator of both species and without adequate and proper control will decimate both populations.

Mise le meas,

**Re: Designated Salmonid Waters Bye Law 2018**

**I wish to express my full support for Minister Sean Kyne regarding the introduction of this Bye Law.**

**Furthermore, I believe that additional measures should be taken to protect our indigenous Salmonid species.**

- 1. There should be no bag limit on pike in designated salmonid waters, as these predators have been the cause of the extermination of salmonids throughout the world.**
- 2. All the designated wild brown trout fisheries should be given the same legislative protection under this Bye Law.**
- 3. There should be two distinctly separate boards overseeing the game and coarse fisheries, with the board overseeing trout and salmon fisheries being geographically located along the western seaboard.**
- 4. The close season as it applies to trout and salmon angling in the Designated Salmonid Waters, should equally apply to all angling activities.**

**Yours Sincerely**

20/5/2018

A Chara,

I am writing in support of the Designated Salmonid Waters Bye -Law 2018 as proposed by Minister Sean Kyne T.D.

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

Pike are the apex predator of both species and without adequate and proper control will decimate both populations.

It's for these reasons I support for this bye- law.

Mise le meas,

Dear Deputy,

It is now the month of May 2018, a time of renewal, growth and vibrancy here around the Great Western Lakes. It is the season of the Mayfly.

A fly that attracts thousands of anglers from home and abroad to our local communities to fish for our world famous brown trout.

This allure has been sustained by generations of anglers. Wild Brown Trout are the attraction.

Without this native indigenous species those people would not come and there would be no Mayfly season or the banter and crack that is part of the Mayfly season.

This is why Minister Sean Kyne's Designated Salmonid Waters Bye-law 2018 is so important in that it aims to protect the native brown trout and all it entails around the Great Western Lakes even down to children picking mayflies and making a few euro.

We seek your support for this Bye-Law as a means to protecting a National Treasure that is the envy of many.

If this is lost through the indifference of politicians it will never be reclaimed.

Yours sincerely,

21/5/2018

A Chara,

I am delighted and fully support the Designated Salmonid Waters Bye -Law 2018 as proposed by Minister Sean Kyne T.D.

Legislation is needed to protect the Great Western Lakes as Wild Brown Fisheries and also to protect the Wild Atlantic Salmon, an endangered species.

The bag limit for pike should be unrestricted as these are world famous brown trout fisheries and pike are detrimental to their wellbeing.

Unless these waters are properly protected from pike they will disappear in our lifetime as renowned brown trout fisheries.

***Re: Designated salmonid Waters Bye-Law 2018***

Dear Minister,

Since its inception in 1953 the club has played a significant role in the development and conservation of Lough Corrib as a wild salmonid fishery. The club and its members have invested heavily in the development of mooring facilities in Pordarragh, Moycullen and the construction of three angling huts, two of which are open access. To date the club has invested significant funds in the development of the Oughterard hatchery for the supply of trout fry, the development of streams and the management of pike. These activities coupled with other Lough Corrib clubs have been critical to developing and maintaining Lough Corrib as a salmonid fishery, which is now recognised internationally as a unique World Class salmonid fishery. **The club welcomes the proposed Designated Salmonid bye-law by the Minister and as a significant stakeholder of lough Corrib the club and its members wishes to express its full support in its implementation.**

Sincerely

Dear Deputy,

We are writing to you requesting your support for Minister Sean Kyne's Designated Salmonid Waters Bye – Law 2018.

Dear Minister

. Ulster Angling Council which represents Trout Anglers in Ulster fully supports, The Minister Sean Kyne bye law on Designated Salmonid Waters.

The passing of this bye Law is critical in the conservation of Trout Stock in our Designated Wild Brown Trout Fisheries.

I would advise the Minister in Donegal twelve Wild Brown Trout Fisheries are now extinct due to the illegal introduction of Pike. Ref: Page 60 Loughs of Ireland author Peter O Reilly now retired former employee of Inland Fisheries Ireland

While UAC regrets that the Minister did not extend this Bye Law to all Brown Trout Fisheries. UAC recognises the significance this Bye Law will make in conserving wild Brown Trout stocks on the seven named Fisheries

It is our hope that the Minister will extend in the near future similar bye Laws to protect our remaining indigenous Wild Brown Trout Fisheries.

Yours sincerely

Dear Deputy,

It is now the month of May 2018, a time of renewal, growth and vibrancy here around the Great Western Lakes. It is the season of the Mayfly.

A fly that attracts thousands of anglers from home and abroad to our local communities to fish for our world famous brown trout.

This allure has been sustained by generations of anglers. Wild Brown Trout are the attraction.

Without this native indigenous species those people would not come and there would be no Mayfly season or the banter and crack that is part of the Mayfly season.

This is why Minister Sean Kyne's Designated Salmonid Waters Bye-law 2018 is so important in that it aims to protect the native brown trout and all it entails around the Great Western Lakes even down to children picking mayflies and making a few euro.

We seek your support for this Bye-Law as a means to protecting a National Treasure that is the envy of many.

If this is lost through the indifference of politicians it will never be reclaimed.

Yours sincerely,

Inland Fisheries Division

20/5/2018

A Chara,

I am writing in support of the Designated Salmonid Waters Bye -Law 2018 as proposed by Minister Sean Kyne T.D.

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

Without proper protection both of these species will disappear in a short space of time.

Pike are the apex predator of both species and without adequate and proper control will decimate both populations.

It's for these reasons I support for this bye- law.

Mise le meas,

Dear Deputy,

We are writing to you requesting your support for Minister Sean Kyne's Designated Salmonid Waters Bye – Law 2018.

This piece of legislation is paramount in the protection of the Great Western Lakes as Wild Brown Fisheries and also the protection of the Wild Atlantic Salmon, an endangered species.

**Re: - Designated Salmonid Waters Bye Law 2018**

Dear Deputy,

I am seeking your support to ensure the safe passage of the Designated Salmonid Waters Bye Law 2018.

This Bye Law is essential in safeguarding Trout stocks in our Designated Wild Brown Trout Fisheries. There are fourteen Designated Wild Brown Trout Fisheries left in Europe thirteen of which are in Ireland.

All of the eminent scientists agree that.

- Brown Trout is an indigenous species to Ireland here since the Ice Age.
- Pike is a predator and needs to be controlled on Designated Wild Brown Trout Fisheries.
- The Preferred diet of Pike is Trout.
- The unlawful introduction of Pike into Brown Trout Fisheries has resulted in the near extinction of the native Brown Trout in those waters.
- Pike is regarded as Invasive.
- There are over Eight Thousand Pike fisheries in Ireland

While I support this Bye Law on Designated Salmonid Waters I would have wished it had been extended to all Designated Salmonid Waters rather than just seven.

I respectfully ask your support to ensure this Bye Law makes it on to the Statue books

Yours Sincerely,

Dear Deputy,

We are writing to you requesting your support for Minister Sean Kyne's Designated Salmonid Waters Bye - Law 2018.

**Re: Designated Salmonid Waters Bye Law 2018**

**I wish to express my full support for Minister Sean Kyne regarding the introduction of this Bye Law.**

**Yours Sincerely**

**Re: Designated Salmonid Waters Bye Law 2018**

**I wish to express my full support for Minister Sean Kyne regarding the introduction of this Bye Law.**

**Furthermore, I believe that additional measures should be taken to protect our indigenous Salmonid species.**

- 1. There should be no bag limit on pike in designated salmonid waters, as these predators have been the cause of the extermination of salmonids throughout the world.**
- 2. All the designated wild brown trout fisheries should be given the same legislative protection under this Bye Law.**
- 3. There should be two distinctly separate boards overseeing the game and coarse fisheries, with the board overseeing trout and salmon fisheries being geographically located along the western seaboard.**
- 4. The close season as it applies to trout and salmon angling in the Designated Salmonid Waters, should equally apply to all angling activities.**

**Yours Sincerely**

Sean Kyne, T.D.

Dear Minister

I wholeheartedly support the proposed Bye Law which will provide the necessary Laws to Designate the 7 named lakes as Salmonid Waters and the daily bag limit of 4 pike per day.

This By-Law is essential to the survival of the Internationally Recognised Brown Trout Fisheries. The fisheries are some of the few remaining Brown Trout fisheries which we have the opportunity to save for future generations of Irish Anglers. These Fisheries are a National Asset which must be protected.

Yours Sincerely

***Re: Designated salmonid Waters Bye-Law 2018***

Dear Minister,

Since its inception in 1953 the club has played a significant role in the development and conservation of Lough Corrib as a wild salmonid fishery. The club and its members have invested heavily in the development of mooring facilities in Pordarragh, Moycullen and the construction of three angling huts, two of which are open access. To date the club has invested significant funds in the development of the Oughterard hatchery for the supply of trout fry, the development of streams and the management of pike. These activities coupled with other Lough Corrib clubs have been critical to developing and maintaining Lough Corrib as a salmonid fishery, which is now recognised internationally as a unique World Class salmonid fishery. **The club welcomes the proposed Designated Salmonid bye-law by the Minister and as a significant stakeholder of lough Corrib the club and its members wishes to express its full support in its implementation.**

Sincerely
