**1. Have the relevant aspects of the environment as they relate to the NBP-Intervention Strategy been described?**

Yes

**If you have any further observations, please add comment below:**

**2. Have the relevant significant effects [positive and negative] of implementation of the NBP-Intervention Strategy been considered?**

Yes

**If you have any further observations, please add comment below:**

**3. What amendments to the Intervention Strategy are required to adequately reflect the findings of the SEA report and the NIS?**

**4. What, if any, observations do you have regarding the High Speed Broadband Map Process?**

My main issue is the fact that Eir seem to be holding up the rollout of the scheme by rolling out fiber in what appears a arbitrary fashion in rural areas. They also now have run fiber to the home within 450m of my location even though there are 5 further premises (including a business) on the road. It's not particularly transparent as to how and why some roads\houses get FTTH and then others don't. It also seems apparent that no other company will realistically win any bid for pockets of houses when eir have those pockets surrounded with fiber. It's seems that the final map process will never end at this rate.
