1. Have the relevant aspects of the environment as they relate to the NBP-Intervention Strategy been described?

Yes

If you have any further observations, please add comment below:

2. Have the relevant significant effects [positive and negative] of implementation of the NBP-Intervention Strategy been considered?

No

If you have any further observations, please add comment below:

Many people, myself included, require broadband for work. I am a staff member in Dublin City University, but am home every weekend. Currently, I cannot collaborate with colleagues due to the awful broadband we currently receive. I must either delay work or stay in Dublin in order to achieve what could otherwise be done at home, just because of poor internet access. The NBP Intervention strategy will not provide internet for people in my position.

3. What amendments to the Intervention Strategy are required to adequately reflect the findings of the SEA report and the NIS?

4. What, if any, observations do you have regarding the High Speed Broadband Map Process?

The map process appears quite arbitrary, and ignores areas of need, while providing high speed access to areas with little apparent need.
