Sanitary Certificate for the exportation of slaughtering cattle to EGYPT

PART I: COMMERCIAL INFORMATION

A) / Description of shipment

1. Name and address of consignor:
2. Name and address of consignee:
3. Certificate N°:
4. Competent authority: **Department of Agriculture, Food and the Marine**
5. Certifying body: **Department of Agriculture, Food and the Marine**
6. Country of origin (ISO Code): **IRELAND (IE)**
7. Country of destination (ISO Code): **EGYPT (EG)**
8. Place(s) of origin- Name Address, Approval number:
9. Date and place of loading:
10. Place of destination:
11. Identification of the means of transport:
12. Identification of container(s) and seal(s):

B) Identification of the commodity

13. Description of commodity:
- 14 Total quantity:

Certificate number:

15. Identification of commodity:

Species	Breed	Identification	Identification number	Age	Sex	Quantity
---------	-------	----------------	-----------------------	-----	-----	----------

PART II Sanitary Information

The undersigned official veterinarian certifies that the commodity described above by the present sanitary certificate satisfies all the following sanitary requirements:

I - COUNTRY AND ZONE OF ORIGIN

- 1 The country of origin has put in place a Cattle Tracing System (CTS) for identification of all cattle, their registration and their movements from birth to death, allowing trace back to the dam and the herd of origin.
- 2 The territory of the zone of origin is free from foot-and-mouth disease, lumpy skin disease, rinderpest, and vesicular stomatitis.
- 3 The zone of origin is free from case of foot and mouth disease without vaccination in accordance with the OIE definition.
- 4 Bovine Spongiform Encephalopathy
 - a) The country of origin is carrying out an epidemiological programme for BSE surveillance and eradication in accordance with the O.I.E recommendations, in particular
 - b) In case of BSE suspicion, all cattle movements are prohibited for the concerned herd.
 - c) The infected animal and the cohort of animals at risk are fully destroyed and incinerated when a confirmed BSE case occurs.
 - d) The use of mammalian protein (except from milk and milk products) is forbidden for feeding ruminants, and this measure is applied in compliance with EC regulation.
- 5 The country has a national eradication scheme for bovine tuberculosis and exported animals originate from herds officially free from bovine tuberculosis.
- 6 Ireland is officially free from bovine brucellosis and bovine enzootic leukosis
- 7 The country is free from theileriasis, Surra (*trypanosoma evansi*), heartwater, new world screwworm and old world screwworm.
- 8 According to Directive 96/23/EC, the country implements every year a national survey plan for investigation of residues of veterinary drugs, growth promoters and environmental contaminants in meat.
- 9 According to Directive 96/22/EC, the use of anabolic or hormonal growth promoters is forbidden for feeding ruminants or injection or implantation.
- 10 Animals are born and reared in Ireland

II - HERDS OF ORIGIN

- 1 No outbreak of any contagious disease (including bovine brucellosis and bovine leukosis) has been declared for at least 6 months in the herds of origin.

Certificate number:

- 2 No case of bluetongue has been recorded in the herd of origin for a period of at least 60 days prior to the date of dispatch. Ireland is officially free of Bluetongue
- 3 No case of BSE is recorded in the herd of origin for 8 years according to OIE standard.

III - Exported Animals

- 1 **Slaughtering animals were not more than 30 months of age with weight not less than 350 Kg at the start of the residency period outlined in Point 2 below.**
- 2 The animals intended to be exported to Egypt were resident on the farm or farms of origin for at least 21 days prior to export¹. During the residency period the animals were kept separate from other animals not intended for export to Egypt.
- 3 The animals were not in contact with other animals of different sanitary status during the residency period, transportation and shipment.
- 4 The exported animals are males, are identified with a permanent tag, have an individual identification number and are accompanied by the copy of their original identification card.
- 5 The exported animals are not to be culled under a national eradication program of contagious diseases especially BSE and Bovine Tuberculosis.
- 6 The animals have not been fattened on any food containing meat and bone meal or any animal proteins (except from milk).
- 7 The animals show no clinical evidence of any contagious disease at the time of loading and in particular of diseases mentioned in section II in relation with the herd of origin.
- 8 The animals were protected from attacks of culicoides likely to be competent BTV vectors during transportation to the place of shipment. The animals were treated before export with an insecticide approved by the Irish Department of Agriculture, Food and the Marine (Name of product Meat Withdrawal Period).
- 9 Regarding Bluetongue (BT):
 - Ireland is officially free of Bluetongue.
 - The animals showed no clinical sign of BT on the day of shipment
 - The animals were kept in a BTV free country since birth
 - The animals were not vaccinated against BTV.
- 10 In case of any emerging diseases we should follow the World Organization for Animal Health code "OIE" in requirements for export.
- 11 Regarding Bovine Tuberculosis:
 - The animals showed no sign of Bovine Tuberculosis on the day of shipment
 - The animals originated from a herd free from Bovine Tuberculosis
 - The animals were subjected to a tuberculin test for Bovine Tuberculosis with negative results during the 30 days prior to shipment.
 - The animals were not being eliminated as part of an eradication programme against Bovine Tuberculosis.

Certificate number:

PART III: SIGNATURE

1. **Official position of the certifying officer** **OFFICIAL VETERINARIAN Official stamp:**
2. **Place and date:**
3. **Name (personal stamp) and signature of the official veterinarian:**

Footnote:

1. The examination of animals during the residency period outlined in Section III Point 2 will be in cooperation with an Egyptian Veterinary Delegation.
-

CARRIER'S ATTESTATION

Vehicles used for transportation of cattle have been properly cleaned and disinfected before loading with products officially approved by the veterinary authorities.

Name, Signature and Stamp of the carrier
