PART II: SANITARY INFORMATION

I the undersigned official veterinarian hereby certify that:

1. Country of Origin

- a. Ireland has a mandatory official national cattle identification and registration programme that permits traceability of cattle from birth to slaughter or death.
- b. Ireland is a Controlled Risk Country, regarding BSE, in accordance with OIE requirements.
- c. Ireland is officially free from Foot and Mouth Disease, Blue Tongue, Rift Valley Fever, Lumpy Skin Disease, Rinderpest, Contagious Bovine Pleuropneumonia, Vesicular Stomatitis, Bovine Brucellosis and Enzootic Bovine Leukosis.

2. Herd of Origin

- a. The herds of origin are officially free from all notifiable infectious diseases including Tuberculosis, Brucellosis and Enzootic Bovine Leukosis.

3. The animals described above,

- a. Were born in Ireland and are identified by an individual tag, applied to both ears in accordance with the national cattle identification programme.
- b. Originate from registered cattle herds.
- c. Were isolated for the 30 days prior to export.
- d. Were tested with negative results for Bovine Tuberculosis using the comparative intradermal tuberculin skin test within 60 days prior to export.
- e. Animals have not been treated with natural or synthetic oestrogenic (excluding estrus synchronization), androgenic, gestagenic or thyrostatic preparations.
- f. Before departure, were treated for external and internal parasites :
 - i. Name of product:
 - ii. Date of Treatment:

4. The animals are not being transported with cattle of a different health status and the means of transport has been cleaned and disinfected prior to the loading of the animals.

5. The consignor has made a written statement that the animals will be shipped directly to the place of destination in means of transport that complies with international transport provisions for live animals.
