Notified Products under Art 89 of 528/2012

Disinfectant	Diseases in respect of which use is approved and dilution rates ¹				
	Foot and Mouth Disease	Swine Vesicular Disease	Poultry Disease: Avian Influenza & Newcastle Disease	Other scheduled Diseases: Including Anthrax, Brucellosis, Contagious Bovine Pleuropneumonia and Glanders	
Bimodex	550	100	100	49	
BioPhen	---	---	15	10	
Bio Shield P	60	---	80	40	
Bio VX	1200	100	200	100	
Cyclex	---	---	24	24	
FAM 30	550	100	100	49	
Farmklear	80	---	50	44	
Farmsan	550	100	100	49	
GPC 8	80	---	50	44	
Hyperox	150	---	150	179	
Incimaxx DES-N	125	---	50	50	
Intercid	---	---	100	40	
Interfarm 500	1000	---	500	500	
Interkokask	19	19	24	50	
Interkokask Concentrate	24	24	50	50	
Intra Hydrocare	---	---	---	10	
Intra Multi DES GA	---	---	66	49	
Jeyes Fluid	---	---	20	---	
KC 5000	---	---	80	50	
Kenocox	---	---	---	100	
Kick Start 2	800	25	145	256	
Kilcox Extra	---	100	100	50	
Omnicide	---	100	125	50	
Omnicide FGII	---	100	125	50	

Perbac Farm	800	25	145	256	
Septrivet 17	299	299	449	299	
Sorgene Xtra	800	25	145	256	
Virex	1300	100	100	100	
Virkon Advanced	---	---	250	200	
Virkon H20	---	---	200	100	
Virkon LSP	1100	50	90	40	
Virkon S	1300	100	280	100	
Virkon S Tablets	1000	---	250	100	
Virocid	100	100	60	33	
Virophor 2.8%	550	150	99	50	
Viroshield	---	300	100	25	
Virudine Plus	550	100	100	49	

¹Dilution rate is expressed as one part (1 gram or 1 ml) of the preparation to the number of mls of water in the appropriate column.

NOTE: READ CAREFULLY THE MANUFACTURER'S INSTRUCTIONS BEFORE USAGE PARTICULARLY IN RELATION TO SPECIFIED PRECAUTIONS

Note: Dilution rates for disinfectants for use against Foot and Mouth Disease and/or Swine Vesicular Disease relate to effectiveness when applied to a clean surface.

- (a) thoroughly cleansed, ensuring that dung, litter, etc. is removed and disposed of so that there is no risk of contact with livestock; and
(b) (the clean area) washed or sprayed with an approved disinfectant used at the approved dilution

(---) = Not approved

This list is **provisional**. Disinfectants approved by DAFM must fulfil the following criteria:

- (1) Inclusion on the DAFM "Biocidal Products Register" which is controlled by the Pesticide Registration and Controls Divisions (PRD/PCD). This Register contains a list of authorised, notified and permitted biocidal products. Under S.I 427 of 2013, a person shall not place on the market, make available or use a biocidal product unless that product is entered in the "Product Register" or is subject to a grace period determined under Regulation 19 (5) of Reg. (EU) No. 528/2012 as amended by Regulation (EU) No 334/2014. Forms for notification of biocides are available at www.pcs.agriculture.gov.ie. Authorisation of a product must be carried out according to the provisions of the Biocidal Products Regulation (EU) No. 528/2012 as amended by Regulation (EU) No 334/2014.
- (2) The disinfectant must have demonstrated efficacy in laboratory testing against the agent for which it is approved for use. Testing is conducted either at the Institute of Animal Health, Pirbright, or the Veterinary Laboratory Agency, Weybridge depending on the pathogenic agent. Details are available at www.defra.gov.uk.
- (3) For each of the products listed, DAFM must be provided with the following:
 - Safety Data sheet
 - PCS number or IE/BPA
 - Certificate of testing against one or more of the diseases (including dilution rates)
 - Copy of DEFRA list showing relevant product (if the product distributed in Ireland has a different trade name, there should be a letter from the company stating that the products are identical)
 - Sample labels in conformity with Article 69 of the BPR
